

CONFIDENTIAL

C. C. P. 244

[Communicated to the Council of
the League and to the Contracting
Parties to the 1925 and 1931
Conventions.]

Geneva, November 15th, 1938.

PERMANENT CENTRAL OPIUM BOARD

LEAGUE OF NATIONS

REPORT TO THE COUNCIL

**ON THE STATISTICS OF NARCOTICS FOR THE YEAR 1937
AND THE WORK OF THE BOARD DURING 1938**

Issued in compliance with the terms of the

**Geneva Opium Convention, signed
on February 19th, 1925,**

and the

**Convention for limiting the Manufacture and
regulating the Distribution of Narcotic Drugs,
signed at Geneva on July 13th, 1931**

Statistics concerning dihydrohydroxycodeinone,
hydrocodeinone, dihydromorphinone and acetyl-
inone are for Governments' official use

GENERAL COMMENTS

The Permanent Central Opium Board has the honour to present to the Council of the League of Nations the following report on the statistics for the year 1937, and on the work of the Board during the year 1938.

The Board has held four sessions during the year, from April 5th to 14th, from June 21st to 24th, from August 23rd to 27th and from November 1st to 7th; and a special meeting on May 25th and 26th.

At its session in April 1938, the Board re-elected Mr. L. A. LYALL as President and Mr. Herbert L. MAY as Vice-President. There was no change in the membership of the Board throughout the year.

For over a year, the Board has been one short of its full number; some of its members live far from Geneva; and most of them have other duties to attend to besides the work of the Board. They are sometimes unable to come to Geneva or unable to stay till the end of a session. The Board has more than once had some difficulty in maintaining a quorum. Moreover, the Geneva Convention of 1925 says that "The Central Board shall consist of eight members". It seems, therefore, that the Board should be maintained at this number, and the Board expresses the earnest hope that, before the new Board meets, an eighth member will be appointed. As six of the seven members already appointed are connected with large manufacturing or producing countries, the Board thinks that the eighth member should be connected with a country that does little producing or manufacturing, in order that an equitable proportion may be attained between "persons possessing a knowledge of the drug situation, both in the producing and manufacturing countries on the one hand and in the consuming countries on the other hand, and connected with such countries", as is laid down in Article 19, paragraph 5, of the Geneva Convention.

The Board has been in existence for ten years and has now come to the end of its second mandate. It thinks it right, therefore, to state shortly what has been accomplished in the field of the international control of narcotic drugs during these ten years, what remains to be done, the weaknesses that practice has revealed in the Narcotics Conventions, and the chief dangers ahead.

The main object of the Geneva Convention was to prevent dangerous drugs from entering a country without the knowledge or consent of its Government. It lays down that no narcotics shall be exported unless the importing country has issued an import certificate for them. Statistics of imports and exports are sent quarterly to the Board, which checks one against the other. But as the statistics only give aggregate figures and no details of specific shipments, if a shipment made in the last days of one quarter reaches its destination in the next quarter, the Board cannot tell whether such shipment arrived or not, until it has received the import statistics for the following quarter. If these statistics do not remove the discrepancy, the Board asks for details of the various shipments and arrivals, and communicates them to the Governments concerned, which enables the Governments to find out which shipments failed to arrive, and to determine who was responsible for diverting them into the illicit traffic, or how they disappeared. Inadequacies in the system of control have been eliminated, and, year by year, escapes into the illicit traffic have grown fewer and fewer. For manufactured drugs, they have all but ceased.

For raw materials, especially opium, the same cannot be said. Huge discrepancies have repeatedly been found between the amounts of opium reported as shipped to various countries and the amounts received by them. The explanation is partly due to the fact that not all the great opium-producing countries are parties to the Geneva Convention, and that, in some of them, the Government control is scarcely adequate. But there is another fact that must be kept in mind. In a number of countries and territories in the Far East, opium-smoking is still permitted, and the opium is sold by the Government at a very high profit. This naturally stimulates smuggling. Opium sold by a Government has precisely the same effect on the consumer as opium sold by a smuggler. As long as opium-smoking is authorised, it is probable that shipments of opium, not covered by import certificates, will continue from countries not parties to the Geneva Convention.

The Limitation Convention of 1931 was intended to limit the amount of narcotic drugs manufactured throughout the world to the amounts needed for medical and scientific requirements. It differed from the Geneva Convention in covering non-habit-forming as well as habit-forming drugs. The Limitation Convention only called for yearly statistics of the imports and exports of the less dangerous drugs, such as codeine and dionine. These yearly statistics are insufficient for the purpose of discovering which consignments of narcotics fail to reach their destination; for enquiries cannot be begun by the Board till the second year's statistics are received, and the Board has seldom felt justified in asking a Government to report all the details concerning every shipment of codeine

or dionine made two years ago by its exporters to a certain country, and then asking the Government of the importing country to check these details with its import certificates. For, in the case of yearly statistics, the number of shipments to be checked is four times as great as for quarterly statistics; and the length of time that has elapsed since the shipments were made is also four times as great. These yearly statistics do, however, show the extent of the international trade in codeine and dionine; and if, at any given moment, exports to a given country have, over a course of years, been much more or less than the reported imports, the Board will be able to draw attention to the fact.

The Limitation Convention does not deal with raw materials such as raw opium, coca leaves and Indian hemp. The objects of the Convention had to a very large extent already been achieved by the Geneva Convention. The tons and tons of morphine and heroin manufactured in licensed factories and thrown into the illicit traffic before the Geneva Convention came into force had mostly ceased to be manufactured when the Limitation Convention was drawn up, because they could no longer be exported legally. But there was one great defect in the Geneva Convention. It only applied to certain specified drugs. If a chemist could invent a new drug with the same effects as morphine or heroin, he could launch it into the illicit traffic without breaking the law. Benzoylmorphine was such a drug. The Geneva Convention did, it is true, contain provisions for bringing new drugs under control, but they were too cumbrous to be effective. This defect was remedied by the new Convention (Article 11), which applies to all new drugs unless they are incapable of producing addiction. The two Conventions have, as far as can be judged, reduced the amounts of drugs manufactured in licensed factories to the amounts needed throughout the world for medical and scientific requirements.

A very great task has thus been successfully accomplished. Yet there can be no doubt that tens of thousands of drug addicts are still to be found in the world, and that by some means or other they get hold of the drugs they require to satisfy their craving. It is unlikely that more than a very small portion of these drugs comes from licensed factories, unless the statistics furnished to the Board are entirely incorrect, which the Board does not for one moment believe. The large quantities of drugs found in the illicit traffic must therefore mostly be produced in clandestine factories.

The statistics sent to the Board throw very little light on the source of the raw materials that supplies these clandestine factories. If a large quantity of raw opium disappears, the first opium table given in the Board's statistics ought seemingly to show it; but the test is not reliable, for the Board gets little or no information on the varying morphine content of opium, and no information whatsoever regarding the shrinkage in weight due to loss of moisture. Furthermore, when clandestine factories exist in countries which produce the raw materials and do not report to the Board, the Board has no official information bearing on the situation.

Immense quantities of opium are produced yearly for which there is no legitimate demand. It is therefore to be feared that this opium will be sold for illicit purposes. Until the quantity of opium produced throughout the world is reduced to the amount needed for legitimate purposes, the illicit traffic will continue. And, furthermore, as long as Governments countenance and make a profit out of opium-smoking, opium-producing countries are not likely to cut down their production to the desired limit. The question of limiting the production of raw opium is now under consideration.

Article 24 of the Geneva Convention has given rise to considerable discussion in the Board. The first difficulty that confronted the Board in this matter was that the French and English texts of Article 24 do not agree. The great majority of the countries with which the Board corresponds use French as their international official language, and the Board has therefore, when writing to them, to quote the French text of the Narcotics Conventions. The French text of Article 24¹ of the Geneva Convention says that the Board shall have the right to intervene "si les renseignements dont il dispose le portent à conclure qu'un pays donné accumule des quantités exagérées d'une substance visée par la présente Convention, et risque ainsi de devenir un centre de trafic illicite". According to this text, the Board can only take action when a country is accumulating too great a quantity of narcotics; but it is not by the accumulation of narcotics that a country becomes a centre of illicit traffic, but by those narcotics being thrown month by month into the illicit traffic as soon as they come to hand. Moreover, the Board is instructed to take action not when a country is a centre of the illicit traffic, but when it is in danger of becoming one. It almost seems that the article was intended only to guard against an over-accumulation of stocks. But large stocks, if they are properly guarded, are not a serious danger, and it seems incredible that the framers of the Geneva Convention should have provided the elaborate machinery of Article 24 to protect the world against so insignificant a danger. And there are other ambiguities in Article 24. What is "the information at the disposal of the Board"? Is it merely the statistical information supplied to the Board? If this is the meaning, it would support the view that the Board is only to take action when there is an over-accumulation of stocks. Lastly, the penalty provided in Article 24 is inadequate. The penalty is "that no further exports of the substances covered by the present Convention . . . shall be made to the country concerned" by the contracting parties. If a country grows its own opium and manufactures its own drugs, this penalty cannot affect it materially, and, if it does not grow opium, it will still be able to import from countries that have not signed the Geneva Convention.

¹ English text:

"If the information at its disposal leads the Board to conclude that excessive quantities of any substance covered by the present Convention are accumulating in any country, or that there is a danger of that country becoming a centre of the illicit traffic".

Article 24, however, has been of some use, and the Board has used it on several occasions. The Limitation Convention, moreover, provides further safeguards where manufactured drugs are concerned.

The chief danger that threatens the future of the Board's work, and thereby the international control of narcotics, is, however, not due to the ambiguities of the Geneva Convention, but to the political changes that are taking place throughout the world. As a result of these changes "Manchukuo" does not send statistics to the Board. "Manchukuo" is a great opium-producing country and is generally believed to manufacture large quantities of narcotic drugs. Italy, again, has not sent any statistics whatever for a later period than the second quarter of 1937. In 1936, Italy manufactured 1,335 kg. of morphine. Thus the missing Italian statistics make a serious gap in the statistics published by the Board.

The effectiveness of international control over the traffic in narcotic drugs largely depends on reports from the great manufacturing countries. Apart from this, if a country which is not only a large manufacturer but also a large exporter should cease to furnish statistics and, when it is needed, detailed information about discrepancies, control may be seriously impaired.

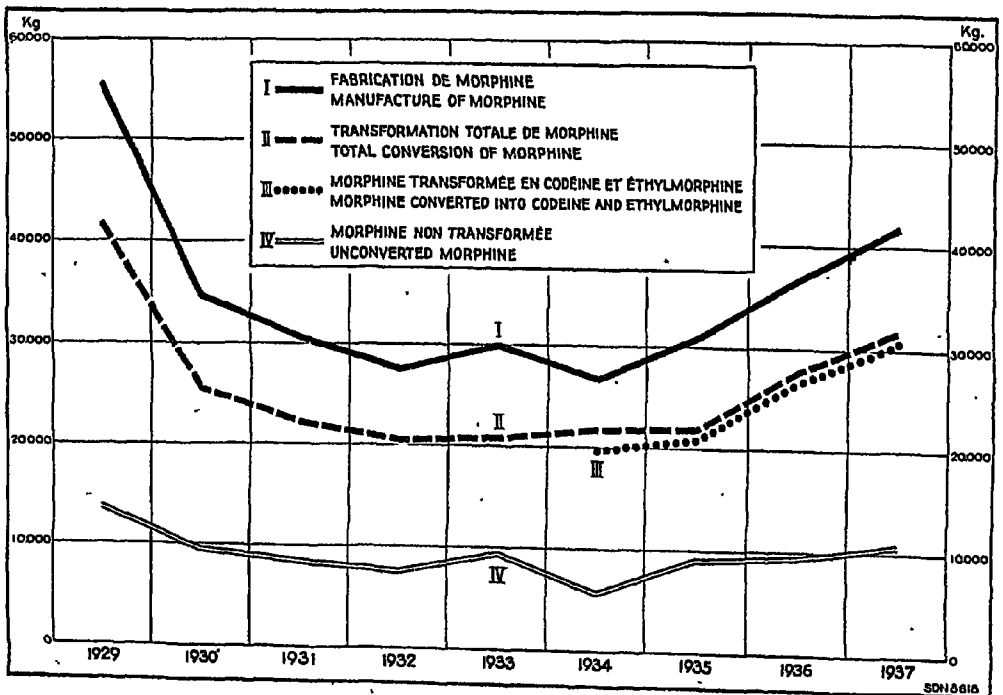

It is, therefore, not without misgivings that the present Board relinquishes its task to its successors. The illicit traffic is a menace to the whole world, and can only be suppressed by universal co-operation. It would be most unfortunate if the great advance that has already been made towards the suppression of this traffic should be endangered by political disagreements. The Board thinks, therefore, that it would be well for the contracting parties to consider carefully what steps should be taken to keep, or win back, for the Board the full support of countries that are estranged from the League of Nations.

WORLD MANUFACTURE FROM 1929 TO 1937

It has been stated above that the amount of drugs manufactured in licensed factories has been reduced throughout the world to the amounts needed for medical and scientific purposes. It is interesting to pursue this general statement somewhat further in the light of the statistics sent to the Board since its inception; for it is manufacture which, in the present state of our knowledge, is the best available index of the progress made. In manufacture, it is morphine which presents the greatest interest; for morphine is not only itself used as a drug, but is also converted into other drugs, of which the most important are diacetylmorphine, codeine and ethylmorphine.

Morphine: Manufacture and Conversion.

The following graph shows, for morphine, the changes of the last nine years.

Manufacture.

The top line (I) shows the total amounts manufactured. Manufacture was still high in 1929. It dropped sharply and suddenly in 1930, probably because in that year control was established over morphine esters, which were being manufactured for the illicit traffic. There follow four years of more gradual decline, interrupted by a slight rise. Then the line rises steadily up to the end of the period. What are the causes of these fluctuations? Why did the manufacture of morphine decrease in the early years of the graph and increase later? What has become of the increase?

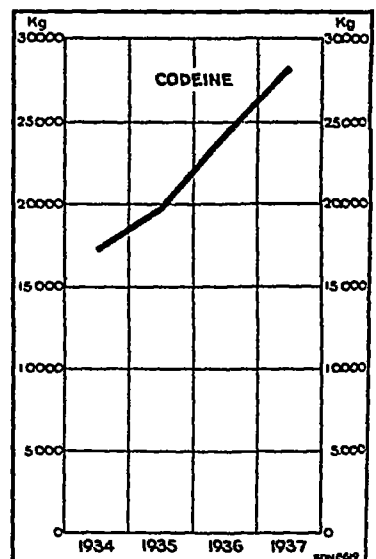

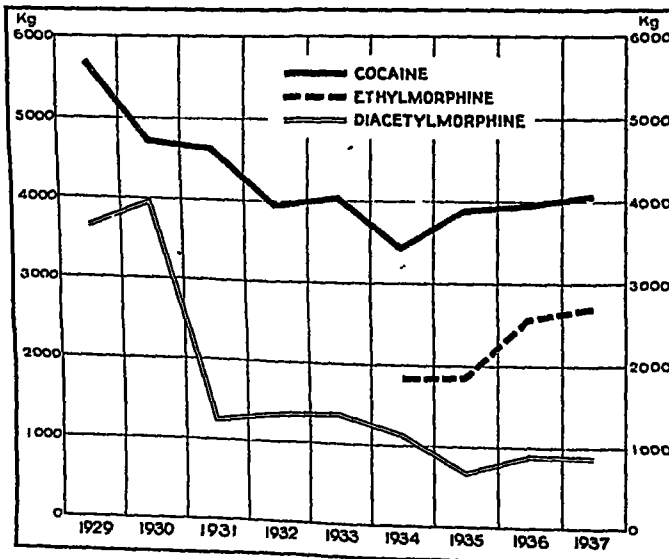

Conversion.

The next line (II) shows how much morphine has been used for making all morphine derivatives, of which the most important appear in detail on the next graphs. This line runs almost parallel with the top line. It looks, therefore, as if more or less morphine is manufactured, according as more or less is required for making these drugs. This is confirmed by looking at the bottom line (IV), which shows the amount of morphine that has been left unconverted. It hardly wavers.

There is another shorter line (III), which shows separately how much morphine has been used for making two especially important derivatives, codeine and ethylmorphine. The line begins with 1934. The reason for this is as follows. It was not until the Limitation Conference of 1931 that it was decided to extend control over these drugs, which were not held to be capable of producing addiction; and not until 1934 that Governments were bound to send figures showing separately the amounts used for each of them. Now the drugs manufactured out of morphine fall roughly into two groups—dangerous drugs capable of producing addiction, and less dangerous ones. Among the latter are codeine and ethylmorphine, which are especially important, because they are the most widely used for medical purposes. The special line for these two drugs has been inserted for this reason, and because it illustrates an important conclusion. The line rises parallel to the lines both of morphine manufacture and conversion. This shows that both the manufacture of morphine and its conversion increased largely because it was required for these two drugs.

Manufacture of Certain Drugs other than Morphine.

The next two graphs show how much has been manufactured of the principal drugs other than morphine. The one on the right shows codeine. It has to be shown on a separate scale because it is made in such large quantities. The others are diacetylmorphine, ethylmorphine and cocaine. As has already been stated, diacetylmorphine, codeine and ethylmorphine are derived from morphine. The lines for these three drugs show what has happened to most of the converted morphine represented in line II of the first graph. A separate examination of each line leads to certain interesting conclusions.

Drugs manufactured from Morphine.

Diacetylmorphine is by far the most dangerous drug known to lead to addiction. The Conference of 1931 put the international trade in this drug under special restrictions; it urged that Governments should abolish or limit its use; and some Governments have entirely prohibited it. Very soon after the Board began its work, the use of this drug declined so sharply that only about one quarter of the 1930 manufacture remained. It probably stands at about the same level now. It must not be forgotten, however, that the Italian manufacture for 1937 is not included.

Codeine, on the other hand, is regarded as a far less dangerous drug; and it is highly valuable in medicine, where it is used in far larger quantities than the other drugs. As the line shows, its manufacture has increased by more than one-half in four years.

Ethylmorphine shows the same movement as codeine; but the quantities are much less—only about one-tenth.

It will be seen at once how important is the downward movement of diacetylmorphine in comparison with the reverse movements of codeine and ethylmorphine.

Drug not manufactured from Morphine.

Cocaine. — The only other important drug which is held to lead to addiction is cocaine. In 1929, manufacture still amounted to about six tons. Probably because substitutes have been more widely adopted, manufacture declined in the next four years, and now seems to be fairly stable at about 4 tons.

What are the two or three broad conclusions to be drawn from this mass of statistical information? The manufacture of all the most dangerous drugs—unconverted morphine, diacetylmorphine and cocaine—fell in the early years and has recently been more or less stable; on the other hand, the manufacture of less dangerous drugs—codeine and ethylmorphine—has shown a tendency to rise. Thus it may be claimed that, without starving medical needs, the efforts of Governments, of the Board and of other international bodies have been successful in substantially restricting, in legitimate manufacture, those substances which present the greatest danger.

STATISTICAL REPORTS RECEIVED

A glance backwards to the beginning of the Board's work shows how that work has increased in range and complexity.

When the Board began, it only had to deal with one Convention with twenty-seven parties to it. Gradually the number increased, both before and after the coming into force of the Limitation Convention in 1933. Now the Board acts under two conventions with sixty-three parties adhering to one or the other, apart from 100 colonies or dependencies.

For 1937, 1,531 statistical reports were received. For 1929, there were only 1,021. The number of forms used has had to be increased; for the 1931 Convention brought new drugs under control and made it necessary to obtain more details about most drugs. This fact and the increase in the number of parties accounts for the increase in statistical reports.

Side by side with this great increase in work due to the growing volume of material, problems of method, now mostly solved, confronted the Board with a formidable task in its early years. It would be idle to describe them in detail. It was obviously not an easy task, even with the ready help of Governments, to build up gradually a body of information at once detailed, accurate and regular, and allowing of comparisons between one country and another and one year and another on a complicated subject bristling with scientific, legal and administrative difficulties.

As will be seen from the table on page 23 of the Annexes, it is broadly true to say that, apart from certain Latin-American countries and certain dependencies, apart from the disturbed area of China, and with the regrettable absence of complete figures from Iran and Italy, the information received by the Board covers the whole world. But it is unfortunately also true that some of the parties do not regularly send their reports at the right time.

The following table shows what reports were missing for 1937:

FORMS NOT RECEIVED FOR 1937 FROM COUNTRIES WHICH WERE PARTIES TO EITHER THE 1925 OR THE 1931 CONVENTION, AT THE BEGINNING OF 1937

Country	Quarterly statistics A(GL) (Roman figures relate to quarters)	Annual statistics
Afghanistan		A(L), C(1)(GL), C(2)(GL), D(GL), E(GL)
Austria		A(L), C(1)(GL), C(2)(GL), D(GL), E(GL)
Bolivia		A(L), C(2)(GL), D(GL), E(GL)

Panama	II, III, IV	A(L), C(1)(GL), C(2)(GL), D(GL), E(GL)
Peru		A(L), C(1)(GL), C(2)(GL), C(3)(G), D(GL), E(GL)
Sa'udi Arabia	I, II, III, IV	A(L), C(1)(GL), C(2)(GL), D(GL), E(GL)

Form A(GL):	Quarterly statistics of imports and exports;
Form A(L):	Annual statistics of imports and exports of methylmorphine (codeine) and ethylmorphine;
Form C(1)(GL):	Annual statistics of consumption, of the quantities purchased in the country for Government purposes, and of the quantities used in the compounding of preparations for the export of which authorisations are not required;
Form C(2)(GL):	Annual statistics of production and manufacture, of the quantities received in factories and of those disposed of by manufacturers;
Form C(3)(G):	Annual statistics of prepared opium (this form relates only to countries and territories in which prepared opium is manufactured or smoked);
Form D(GL):	Annual statistics of stocks;
Form E(GL):	Annual statistics of confiscations.

MACAO

In the course of the last twelve months, the Board has devoted much time to an examination of the question whether there was a danger of Macao becoming a centre of illicit traffic in opium. The statistical returns furnished by the Portuguese Government indicated that the stock of raw opium held in Macao at the end of 1936, together with further imports in 1937, were too large compared with the figures for the years since 1929 of prepared opium, for the manufacture of which the raw opium is utilised. Further, during the years 1929 to 1935, 37,934 kg. more prepared opium was manufactured than was consumed, whereas the stocks of prepared opium at the end of 1935, reported to the Advisory Committee, amounted to 4,248 kg. only. Moreover, according to the reports¹ of the Sub-Committee on Seizures to the Advisory Committee, quantities of raw and prepared opium had seemingly escaped into the illicit traffic from Macao in the years 1935 and 1936.

At the request of the Board, communicated through the Secretary-General of the League of Nations, the Portuguese Government furnished written explanations on these points and also sent a representative, Dr. Fernandes, to the meeting of the Board in June 1938, when the question was considered.

In regard to the first question under discussion—namely, the large stocks of raw opium that existed in Macao, the main contention of the Portuguese Government was that the imports of raw opium into Macao were maintained in 1936 and 1937 at a comparatively high level, mainly as a precautionary measure against the contingency of a shortage of sea transport in time of war or blockade. The Portuguese Government added that this action was fully justified by later events in the Far East. It further stated that imports of raw opium into Macao for the year 1938 would be reduced to 450 cases.

As regards the statement of the Seizures Sub-Committee of the Advisory Committee that certain quantities of prepared opium from Macao had escaped into the illicit traffic in the years 1935 and 1936, the Portuguese Government disputed the fact that the opium alleged to have been seized had escaped from Macao, and also emphasised that a distinction should be made between Macao proper and the Macao region which was not under Portuguese control. Moreover, the

¹ See Report to the Council on the Work of the Twenty-first Session of the Advisory Committee on Traffic in Opium and Other Dangerous Drugs (document C.278.M.168 1936.XI).

Portuguese Government stated that the labels found on the opium had been discovered to be forgeries and the forgers had been punished.

On the point that, during the years 1929 to 1935, over 33 tons of prepared opium that ought apparently to have been in stock in Macao at the end of 1935 had disappeared, the representative of the Portuguese Government stated that the necessary explanations had already been given by the Portuguese representative at sessions of the Advisory Committee and its Sub-Committee on Seizures. The Portuguese Government deplored the fact that the official in charge of the administration of the opium monopoly had betrayed his trust in 1933 and 1934, but added that, since then, the Portuguese Government had spontaneously adopted the necessary measures. The official responsible had been convicted and condemned to the maximum penalty; other persons implicated had been expelled from the colony; and the Governor had resigned his post.

On a full consideration of these explanations, it was felt by the Board at its June meeting that, since the facts on which the Board's action was based concerned the years 1935 and 1936, it was desirable to bring its information up to date before coming to any final conclusions. Dr. Fernandes, at the suggestion of the Board, undertook to bring the whole question of Macao to the personal notice of Dr. Salazar, the Prime Minister of the Portuguese Republic, in whose authority and public spirit the Board had expressed the greatest confidence.

At the meeting of the Board on August 24th, 1938, a statement on behalf of the Portuguese Government was made by His Excellency Professor Caeiro da Matta. He said that the whole matter had been carefully examined by Dr. Salazar, the Portuguese Prime Minister, and that, as a consequence of this examination, Professor da Matta had been instructed to declare that, though making the most express reservations as to many of the points on which the Committee based its impressions and also as to their juridical validity, Dr. Salazar was in agreement with the Board that the situation in Macao, despite the efforts of the Portuguese Government, was not yet satisfactory and might excite apprehension. The Portuguese Government had already ordered a strict and searching enquiry into the facts brought to its attention, and it would inflict severe punishment on anyone found responsible for any offences proved to have been committed.

In making this declaration, the Portuguese Government demanded that the same searching attention and strict supervision as had been bestowed on Macao should be bestowed by the Board on all other countries that produce, import, or prepare opium and its derivatives.

The Board assured the Portuguese representative that this was by no means the first time that it had taken action when the situation as regards narcotic drugs appeared unsatisfactory. Other Governments had already been requested, through the Secretary-General, to furnish explanations, and the Board would continue to make such requests whenever explanations were necessary.

The Board expressed its gratification that His Excellency Dr. Salazar had ordered a direct enquiry to be made, and decided to await the results of that enquiry.

ROUMANIA

It will be remembered that the Board reported last year that certain exports of morphine to Roumania reported by Germany were missing from the Roumanian import statistics.

The Board has now been informed by the Roumanian authorities that these shipments, as notified by Germany, have in fact been received.

WORLD STOCKS OF RAW MATERIALS IN 1937

Raw Opium.

The Board regrets to report that, as in 1935 and 1936, Iran—a great producing country—China and Afghanistan furnished no statistics of their stocks of raw opium held at the end of 1937. Once again, therefore, this survey is based on incomplete data. The figures for the three years 1935, 1936 and 1937 are nevertheless comparable, as they relate to the same countries and territories. Italy has not furnished a return of the stocks held at the end of 1937: in its survey, the Board has accordingly disregarded the stock of 9.8 tons held in that country at the end of 1936. Owing to these gaps, the stocks declared to the Board must be much lower than the true world stocks.

The decline in the total amount of the stocks of raw opium declared to the Board, to which the latter drew attention in its previous report, continued in 1937. Following upon a drop from 2,712 tons to 2,480 tons during 1936, there was a further decline of 683 tons in 1937, thus reducing the total to 1,788 tons at the end of that year. As in 1936, the decline occurred both in countries and territories which produce raw opium and in those manufacturing prepared opium (total decrease: 686 tons). Stocks fell in each of those countries and territories, except in Korea, a producing country, and Kwantung, which manufactures prepared opium, where increases of 1,697 kg. and 2,300 kg. occurred. Stocks held in countries manufacturing morphine increased by 3 tons.

In view of the absence of statistics of stocks held in some important producing countries, and in view of the wide gap between the stocks reported by Turkey and the amount which, according to the Board's calculations, should have remained in stock in that country, it is not possible to ascertain the real volume and fluctuations of total stocks held in all producing countries; and

it is quite possible that they have increased during the year. The Board desires to stress how regrettable it is that the necessary data are lacking.

Stocks of raw opium held in countries and territories which furnish statistics of the manufacture of prepared opium amounted to 856 tons at the end of 1935, 689 tons at the end of 1936 and only 473 tons at the end of 1937. This appreciable reduction is explained by the fact that a number of these countries and territories (for the most part non-producers) have in recent years ceased to import raw opium and have drawn from stock the amounts they require to manufacture prepared opium. These amounts show a tendency to increase: 265 tons in 1936 and 332 tons in 1937. The total stock of 473 tons held at the end of 1937 would therefore be sufficient, on the basis of the manufacture in 1937, to meet the requirements of about eighteen months manufacture of prepared opium. Several of these countries and territories, which had ceased to import raw opium in recent years, began to do so again in 1937 or at the beginning of 1938.

Stocks of raw opium held in countries manufacturing morphine, which had risen from 398 to 434 tons during the year 1936, amounted at the end of 1937 to 437 tons. In nine of these countries, stocks fell during 1937 by 60 tons; but there was an increase of 63 tons altogether in four other such countries: United States of America (45 tons), Germany (11 tons), the Union of Soviet Socialist Republics (6 tons) and Czechoslovakia (1 ton).

Coca Leaves.

As for raw opium, so for coca leaves, it is regrettable that stock statistics for the two most important producing countries, Bolivia and Peru, are lacking. An analysis of stock variations based upon such partial data would be useless.

The Board thus confines itself to mentioning that the aggregate of stocks *declared* was 644 tons at the end of 1935, 555 tons at the end of 1936, and 504 tons at the end of 1937. The reduction of 51 tons in 1937 is chiefly due to decreases in the Netherlands (60 tons) and the Netherlands Indies (26 tons), set off by small increases in other countries.

WORLD MANUFACTURE, CONSUMPTION AND STOCKS IN 1937

MANUFACTURE

The following table shows increases and decreases in the manufacture of drugs in 1937 compared with 1936. In considering "world" figures in this table and throughout this section, and in comparing one year with another, it must be borne in mind that the figures only represent *reported* information, and that there are certain gaps—*e.g.*, for Italy.

	Morphine		
	Total manufacture	Converted	Unconverted
	Kg	Kg	Kg.
1936	36,884	27,708	9,176
1937	41,899	31,542	10,357
Increase	5,015	3,834	1,181
or	13.59%	13.84%	12.87%

	Manufacture of			
	Diacetyl-morphine	Codeine	Ethyl-morphine	Cocaine
	Kg.	Kg.	Kg.	Kg.
1936	870	24,222	2,598	3,954
1937	851	28,345	2,704	4,083
Decrease or increase	— 19	+ 4,123	+ 106	+ 129
or	— 2.18%	+ 17.02%	+ 4.08%	+ 3.26%

Morphine.

The world manufacture of morphine was 41,899 kg., an increase of 5,015 kg. on 1936. Most of the large increase was used for conversion into codeine and ethylmorphine, and some went into stocks; world consumption (see page 14) actually decreased.

Before examining details of increases and decreases, one special aspect of world manufacture deserves consideration—namely, the increasing proportion of morphine made out of poppy straw and not from raw opium. This is shown in the following table:

Year	Morphine manufactured from poppy straw	Percentage of total morphine manufacture
	Kg.	
1936	1,388	3.76
1937	1,842	4.39

As in 1936, the main increases in the manufacture of morphine were in the Union of Soviet Socialist Republics and the United States of America. (Union of Soviet Socialist Republics increase in 1936: 1,748 kg.; in 1937: 2,828 kg. United States of America increase in 1936: 1,427 kg.; in 1937: 2,559 kg.) Other countries, some of which have taken up manufacture recently, increased their output—Japan by 851 kg., the Netherlands by 477 kg., Belgium by 465 kg., Yugoslavia by 408 kg., Czechoslovakia by 339 kg., Poland by 302 kg.

On the other hand, three important manufacturing countries reduced their output considerably—Germany by 1,384 kg.; France by 361 kg.; and the United Kingdom by 213 kg.

The conversion of morphine continues to increase. It was 31,542 kg., or 3,834 kg. more than in 1936. Although certain countries, old-established manufacturers, reduced conversion (Germany by 1,414 kg., France by 755 kg., the United Kingdom by 113 kg.) two important manufacturing countries, the Union of Soviet Socialist Republics and the United States of America, increased conversion by 2,169 kg. and 2,415 kg. respectively. Other countries also increased conversion—i.e., Japan by 536 kg., the Netherlands by 452 kg., Belgium by 390 kg., Czechoslovakia by 313 kg., Poland by 224 kg., Hungary by 201 kg., and Yugoslavia by 202 kg.

The amount of morphine that remained unconverted was 10,357 kg. in 1937, or 1,181 kg. more than in 1936. In most countries the increase went into stocks. The chief increases occurred in the Union of Soviet Socialist Republics (659 kg.), France (394 kg.), Japan (315 kg.), Yugoslavia (206 kg.) and the United States of America (144 kg.). They were partly set off by decreases in Hungary (238 kg.) and the United Kingdom (100 kg.).

Diacetylmorphine.

The total manufacture reported to the Board was 851 kg. as compared with 870 kg. in 1936. But the figure of 851 does not include Italy's manufacture. This amounted to 124 kg. in 1936, or one-seventh of world manufacture, and was included in the 870 kg. reported for that year. Allowing for Italian manufacture, it is probable that there was really a rise in 1937. The Union of Soviet Socialist Republics manufactured 93 kg. more than in the year before; Switzerland 17 kg., Belgium 14 kg.; but the United Kingdom reduced its output by 32 kg. and France by 13 kg.

Codeine.

The total manufacture was 28,345 kg., an increase of 4,123 kg. over 1936. Increases occurred in the United States of America (2,349 kg.) and the Union of Soviet Socialist Republics (1,519 kg.). The other main increases are in Japan (456 kg.), the Netherlands (323 kg.), Czechoslovakia (292 kg.), Belgium (233 kg.), Hungary (201 kg.), Yugoslavia (153 kg.), Switzerland (116 kg.) and Poland (107 kg.). France reduced manufacture by 599 kg., and Germany by 499 kg.

Ethylmorphine.

World manufacture increased from 2,598 kg. to 2,704 kg. The most important increase was in Poland (102 kg.); the most important decrease in France (159 kg.).

Cocaine.

World manufacture was nearly the same in 1937 (4,083 kg.) as in 1936 (3,954 kg.). The main increase was in the Union of Soviet Socialist Republics (278 kg.), and the main decrease in Switzerland (128 kg.).

From this mass of detailed figures for 1937, certain facts emerge. There was a large increase in world manufacture and conversion of morphine, a smaller one in the amount of unconverted morphine. The Union of Soviet Socialist Republics and the United States of America have increased their output under every head. Neither country exports to an appreciable extent. Thus this manufacture is almost all used for home consumption or for stocks. Some countries, which have recently begun manufacturing morphine and its derivatives, have increased their output. On the other hand, the output of these very substances has declined in certain old-established manufacturing countries such as Germany, France and the United Kingdom. A diversion of trade appears to be taking place. No change is reported in the number of manufacturing countries except that they have been joined by Spain, which manufactured 88 kg. of morphine in 1937.

TABLE SHOWING THE QUANTITIES MANUFACTURED, THE STOCKS, AND THE QUANTITIES CONSUMED
IN ALL COUNTRIES REPORTING TO THE BOARD

The figures for 1936 have been revised according to information received after the report for 1936 was printed.

Drug	Year	1	2	3	4	5	6	7
		Stock at the beginning of the year	Manu- facture	Total of columns 1 and 2	Stock at the end of the year	Calculated world con- sump- tion (difference between 3 and 4)	Reported world con- sumption (a)	Estimate of the quantity necessary for use as such (b)
		Kg.	Kg.	Kg.	Kg.	Kg.	Kg.	Kg.
Morphine (unconverted).	1936	8,070	9,176	17,246	7,671	9,575	8,805	10,210
	1937	7,671	10,357	18,028	9,552	8,476	7,665	9,720
Diacetylmorphine . . .	1936	745	870	1,615	775	840	853	953
	1937	775	851	1,626	678	948	835	1,061
Dihydrohydroxycodei- none	1936	404	452	856	430	426	360	615
Dihydrocodeinone . . .	1937	430	410	840	406	434	374	652
Dihydromorphinone . .								
Acetyldihydrocodeinone								
Codeine	1936	8,568	24,222	32,790	8,075	24,715		26,792
	1937	8,075	28,345	36,420	10,053	26,367		26,959
Ethylmorphine	1936	1,176	2,598	3,774	1,095	2,679		3,358
	1937	1,095	2,704	3,799	1,195	2,604		3,023
Cocaine	1936	3,054	3,954	7,008	3,056	3,952	3,541	4,528
	1937	3,056	4,083	7,139	3,082	4,057	3,780	4,858

(a) Including the quantities used for the manufacture of preparations for the export of which authorisations are not required, even if these preparations are intended for export.

(b) Extracted from the Statement issued by the Supervisory Body. The estimated world consumption, as given in the Statement of the Supervisory Body, covers all countries and territories in the world, while column 6 only includes figures for countries that report their consumption to the Board.

CONSUMPTION

Unless otherwise stated, consumption means *reported* consumption.

Morphine.

A number of countries considerably reduced their consumption; for instance, the Union of Soviet Socialist Republics by 655 kg., and the United States of America by 122 kg. There were slight reductions in India, France, Germany, Czechoslovakia, the United Kingdom and Yugoslavia. There were only two considerable increases—163 kg. in Japan and 67 kg. in Roumania.

Diacetylmorphine.

World figures, which appear to show a decrease, may be misleading owing to the absence of Italian returns for 1937. In most countries, variations have been very slight; but consumption went up in the Union of Soviet Socialist Republics from 181 kg. to 276 kg.; and in Korea from 4 kg. to 15 kg.

Codeine.

Owing to the fact that countries are not bound to report their consumption of codeine and ethylmorphine, the world consumption can only be calculated by taking the stock at the end of the year from the amount manufactured during the year plus the initial stock. Calculated consumption for exporting countries also includes the amount used for the manufacture of preparations for which export authorisations are not needed. And, in calculating the consumption of any one country, imports and exports have also been taken into account.

The calculated consumption of codeine rose from 24,715 kg. to 26,367 kg. Comparisons with 1936 show wide variations in some countries. There were large increases in the Union of Soviet Socialist Republics (1,669 kg.) and in the United States of America (779 kg.), and smaller ones in a number of other countries. Consumption seems to have declined in Germany by 1,004 kg., and in France by 893 kg.

Ethylmorphine.

The calculated consumption (2,604 kg.) was almost the same as in 1936. Increases in some countries were offset by decreases in others.

Cocaine.

Consumption went up by 239 kg. from 3,541 kg. in 1936 to 3,780 kg. in 1937. This change is chiefly due to increases in the Union of Soviet Socialist Republics (302 kg.) and Roumania (49 kg.). In both countries, consumption more than doubled.

STOCKS

Judging from the reported figures, world stocks of morphine and codeine went up by about a quarter—i.e., from 7,671 kg. to 9,552 kg. for morphine and from 8,075 kg. to 10,053 kg. for codeine. The stocks of ethylmorphine also went up a little. It is difficult to draw conclusions about stocks of diacetylmorphine, which appear to have fallen from 775 kg. to 678 kg.; for the Italian stocks, which amounted to 111 kg. in 1936, are missing for 1937. The change in the stocks of cocaine since the previous year is insignificant.

* * *

The following conclusions may be drawn from these details of consumption and stocks: In 1936, consumption of all drugs went up; but, in 1937, there were some important reductions. The morphine figures of stocks and consumption confirm the statement already made under "Manufacture" that the increase in manufacture, not absorbed by conversion, went into stocks and was not consumed. The stock increase is probably due to political apprehensions.

SEIZURES IN 1937

Confiscations.

The confiscations of raw opium for illicit import fell from 15,131 kg. in 1936 to 8,615 kg. in 1937. This was chiefly due to the fall in French Indo-China from 6,170 kg. to 804 kg. and in Hong-Kong from 2,590 kg. to 877 kg. The confiscations for illicit export rose, on the other hand, from 434 kg. in 1936 to 1,186 kg. in 1937.

The Union of South Africa was, as in 1936, the country that confiscated most Indian hemp on importation (1,453 kg. in 1937, 1,042 kg. in 1936). Basutoland confiscated 200 kg. of Indian hemp resin on account of illicit export.

The total quantity of morphine confiscated rose from 33 kg. in 1936 to 79 kg. in 1937. The seizures by Yugoslavia of 31 kg. on exportation accounted for most of the increase.

The confiscations of diacetylmorphine also rose from 109 kg. in 1936 to 147 kg. in 1937. The United States of America confiscated 54 kg., Hong-Kong 37 kg. and China 28 kg. The amount confiscated in Kwantung fell from 23 kg. in 1936 to 2 kg. in 1937.

Destructions.

Much larger quantities of confiscated raw opium and Indian hemp were destroyed in 1937 than in 1936. Hong-Kong destroyed 2,232 kg. and Egypt 1,012 kg. of raw opium. Syria and

Lebanon destroyed no less than 8,750 kg. of Indian hemp. France destroyed 98 kg. of diacetylmorphine, and Hong-Kong, in addition to nearly four million diacetylmorphine pills containing an unreported quantity of diacetylmorphine, destroyed 40 kg. of diacetylmorphine.

YIELDS OF MORPHINE FROM OPIUM DURING THE YEARS 1935, 1936 AND 1937, AND AVERAGE YIELDS

The following table shows the amount of opium used for the manufacture of morphine in 1935, 1936 and 1937, the amount of morphine obtained and the yield per cent, as well as the average yield during these three years.

Countries which use less than 200 kg. of opium for the manufacture of morphine have been left out of the list. The quantities of morphine obtained from crude morphine and poppy straw have been left out of the calculations.

Country	Year	Opium used for the manufacture of morphine	Morphine obtained	Yield
		Kg.	Kg.	%

(a) The figures for 1937 are under investigation.

The figures given in the above table must be read with reserve. The study of the yields obtained in manufacture raises numerous difficulties. One of the most serious of these is connected with the raw materials employed—namely, the degree of morphine content.

Other sources of difficulty which are common to all forms of manufacture arise from the difference in the processes employed and the quantities treated; such differences are inevitably reflected in the yields obtained. Even the quantities in course of manufacture at the end of a given year and not finished until the next may affect a comparison between the yields of the two years. The average 1937 yield of morphine made from raw opium (as taken from reported figures) was 11.33% (11.24% was the average for the last three years). This shows that, in spite of the reserves made above, there is a certain stability in the average annual yield from this manufacture.

This is the first time the Board has dealt with the question of the morphine yield of poppy straw. This yield varies considerably from country to country with the quality of straw, and probably also with the efficiency of the processes and machinery employed. Whereas, in Germany and Switzerland, the yield for 1937 was 0.25%, in Hungary and Poland it was about 0.10%.

The Board is making a further study of the whole question, including the yields in the manufacture of other drugs.

EXAMINATION OF THE WAY IN WHICH GOVERNMENTS HAVE FULFILLED THEIR DUTIES UNDER THE 1931 CONVENTION, AS REGARDS MANUFACTURE, CONVERSION, CONSUMPTION, IMPORTS AND STOCKS

The following table shows, for each country, the amounts by which estimates have been exceeded in 1937 for each drug whenever such excesses are 10 kg. or more.

Country	Drug	Manu- facture	Conver- sion	Con- sumption	Im- ports	Stocks
		Kg.	Kg.	Kg.	Kg.	Kg.

The explanations of surplus manufacture called for by Article 6 of the Convention have been furnished by the following countries:

Germany.

Diacetylmorphine. — The surplus manufacture occurred because a quantity in course of manufacture, which it was expected would be finished in 1938, was unexpectedly finished in 1937.

Belgium.

Thebaine. — Estimates will in future take into account thebaine.

France.

Morphine and Diacetylmorphine. — The apparent excess manufacture for the year 1937, according to the Permanent Central Board's interpretation of the provisions of the 1931 Limitation Convention, is due to the replenishment of manufacturers' stocks of alkaloids at the beginning of the year 1937.

Netherlands.

Morphine and Thebaine. — Through an unfortunate combination of events, which the Government much regrets, estimates were exceeded and supplementary estimates for the conversion of morphine and thebaine were forgotten.

Switzerland.

Morphine. — The Government regrets that supplementary estimates were not sent in time.

United States of America.

Morphine. — The manufacture of morphine during 1937 exceeded actual requirements for consumption and maintaining stocks at the desired level by 85 kg. This excess was due to an unexpected decrease in consumption during the year and will be taken into consideration in connection with the manufacture to be authorised during 1938.

The above table calls for the following comments:

Manufacture.

The quantities of drugs which various countries have, according to the calculations of the Board, manufactured over and above the quantities authorised to be manufactured in 1937 are shown in the tables annexed to this report (Part C, page 155). As has been explained in previous reports, these figures are calculated from the statistical returns supplied by such Governments as have reported to the Board. The statistical returns on which these tables are based will also be found in the Annex (Part B, page 26).

The surplus quantities of the principal drugs manufactured in 1937 were:

1,788 kg. of morphine,
58 kg. of diacetylmorphine, and
14 kg. of cocaine.

The corresponding totals for 1936, which included Italy, and which have been amended on the basis of revised returns received after the publication of document C.353.M.240.1937.XI, were:

1,022 kg. of morphine,
105 kg. of diacetylmorphine, and
204 kg. of cocaine.

Imports.

In 1937, there were seventy-five cases where the excess of imports over the quantities permitted by the Convention was greater than 25 grammes, and, in twenty-three of these cases, the situation was subsequently regularised by supplementary estimates. In forty-four of the seventy-five cases, the excess did not appear until the reports for the fourth quarter of 1937 were received—that is to say, after the end of the year, and therefore too late for the action to be taken which is prescribed by the Convention; in only eleven of these cases was the amount of the excess greater than 1 kg. Except in six cases, the quantities were too insignificant for the Board to feel justified in taking action involving an embargo on export.

(Signed) L. A. LYALL,
President.

(Signed) Herbert L. MAY,
Vice-President.

Acting Secretary.

ANNEXES

EXPLANATORY NOTE

1. In the tables, the continents are classified in the following order:

I. Europe.

II. America:

(a) North America;

(b) Mexico and Caribbean;

(c) South America.

III. Asia.

IV. Africa.

V. Oceania.

The countries, colonies, protectorates and mandated territories of each continent are classified in the order adopted in the *Statistical Year-Book* of the League of Nations.

2. Countries, colonies, protectorates or mandated territories are only included in the statistical annexes when the quantities concerned are not less than 1 kilogramme.

3. The statistics have been brought up to date, whenever necessary, in the light of information received from Governments since the publication of previous reports.

4. Decimal figures are throughout preceded by a fullstop and not by a comma.

5. The population figures for 1936 and 1937 given in the tables are taken from the *Statistical Year-Book*, 1936/37 and 1937/38 respectively, of the League of Nations.

A. SITUATION WITH REGARD TO THE RECEIPT OF STATISTICS FOR 1937.

The Governments have been requested by the Central Board to supply statistics regarding the substances covered by the 1925 and 1931 Conventions on the following forms:

Quarterly Statistics.

Form A (GL): Quarterly statistics of imports and exports.

Annual Statistics.

Form A (L): Annual statistics of imports and exports of methylmorphine (codeine) and ethylmorphine.

Form C (1) (GL): Annual statistics of consumption, of the quantities purchased in the country for Government purposes, and of the quantities used in the compounding of preparations for the export of which authorisations are not required.

Form C (2) (GL): Annual statistics of production and manufacture, of the quantities received in factories and of those disposed of by manufacturers.

Form C (3) (G) *: Annual statistics of prepared opium.

Form D (GL): Annual statistics of stocks.

Form E (GL): Annual statistics of confiscations.

The following countries, Contracting Parties to the Convention of February 19th, 1925, and/or the Convention of July 13th, 1931, have furnished the Board with all the above-mentioned statistics:

Australia	Greece	Salvador
Belgium	Haiti	Siam
Bulgaria	Hungary	Spain
Canada	India	Sudan
Chile	Iraq	Sweden
Colombia	Ireland	Switzerland
Cuba	Japan	Turkey
Czechoslovakia	Latvia	Union of South Africa
Danzig	Lithuania	Union of Soviet Socialist Republics
Denmark	Luxemburg	United Kingdom
Ecuador	Netherlands	United States of America
Egypt	New Zealand	Uruguay
Estonia	Norway	Venezuela
Finland	Poland	Yugoslavia
France	Portugal	
Germany	Roumania	

The following country, non-party to the Conventions of 1925 and 1931, has furnished the Board with all the above-mentioned statistics:

Iceland

* This form relates only to countries and territories in which prepared opium is manufactured or smoked.

In addition, the above-mentioned statistics have been received for the following colonies, mandated territories, protectorates, etc.:

Anglo-French:

New Hebrides.

Australian:

New Guinea

Norfolk Island

Papua

British:

Aden

Jamaica

St. Helena

Bahamas

Kenya

Sarawak

Barbados

Leeward Islands:

Seychelles

Cape Verde Islands

Macao

Timor

Portuguese Guinea

Mozambique

of the U.S.A.:

Philippines

¹ Mandate of the British Empire at present exercised by Australia.

The following countries, which were Parties at the beginning of 1937 to the Convention of February 19th, 1925, and/or the Convention of July 13th, 1931, have not supplied the forms mentioned below:

Country	Quarterly Statistics A(GL)	Annual Statistics				
Afghanistan		A(L),	C(1)(GL),	C(2)(GL),	D(GL),	E(GL)
Austria		A(L),	C(1)(GL),	C(2)(GL),	D(GL),	E(GL)
Bolivia		A(L),		C(2)(GL),	D(GL),	E(GL)
Brazil			C(1)(GL),	C(2)(GL),	D(GL),	E(GL)
China	II, III, IV		C(1)(GL),	C(2)(GL),	C(3)(G),	D(GL),
Costa Rica			C(1)(GL),	C(2)(GL),		D(GL), E(GL)
Dominican Republic	IV					
Guatemala		A(L),	C(1)(GL),	C(2)(GL),	D(GL),	E(GL)
Honduras			C(1)(GL),	C(2)(GL),	D(GL),	E(GL)
Iran		A(L),	C(1)(GL),	C(2)(GL),	C(3)(G),	D(GL), E(GL)
Italy	III, IV	A(L),	C(1)(GL),	C(2)(GL),		D(GL), E(GL)
Mexico			C(1)(GL),	C(2)(GL),		D(GL), E(GL)
Nicaragua		A(L),	C(1)(GL),	C(2)(GL),		E(GL)
Panama	II, III, IV	A(L),	C(1)(GL),	C(2)(GL),		D(GL), E(GL)
Peru		A(L),	C(1)(GL),	C(2)(GL),	C(3)(G),	D(GL), E(GL)
Sa'udi Arabia	I, II, III, IV	A(L),	C(1)(GL),	C(2)(GL),		D(GL), E(GL)

*Dependencies, Protectorates,
Colonies and Mandated
Territories :*

Belgian :

Belgian Congo *	I, II, III, IV	A(L),	C(1)(GL),	C(2)(GL),	D(GL),	E(GL)
Ruanda-Urundi *	I, II, III, IV	A(L),	C(1)(GL),	C(2)(GL),	D(GL),	E(GL)

Italian :

Aegean Islands	I, II, III, IV	A(L),	C(1)(GL),	C(2)(GL),	D(GL),	E(GL)
Eritrea	I, II, III, IV	A(L),	C(1)(GL),	C(2)(GL),	D(GL),	E(GL)
Libya	I, II, III, IV	A(L),	C(1)(GL),	C(2)(GL),	D(GL),	E(GL)
Somaliland	I, II, III, IV	A(L),	C(1)(GL),	C(2)(GL),	D(GL),	E(GL)

Spanish :

Spanish Colonies	I, II, III, IV	A(L),	C(1)(GL),	C(2)(GL),	D(GL),	E(GL)
Morocco (Spanish zone)	I, II, III, IV	A(L),	C(1)(GL),	C(2)(GL),	D(GL),	E(GL)

The following countries, territories, etc., non-parties to the Conventions at the beginning of 1937, have not supplied the forms mentioned below:

Albania			C(1)(GL),	C(2)(GL),	D(GL),	E(GL)
Argentine		A(L),		C(2)(GL),		E(GL)
Bahrein Islands	I, II, III					
Ethiopia	I, II, III, IV	A(L),	C(1)(GL),	C(2)(GL),	D(GL),	E(GL)
Liboria	III, IV	A(L),	C(1)(GL),	C(2)(GL),	D(GL),	E(GL)
Paraguay	I, II, III, IV	A(L),	C(1)(GL),	C(2)(GL),	D(GL),	E(GL)*
Tangier		A(L),	C(1)(GL),	C(2)(GL),	D(GL),	E(GL)

* When ratifying the Opium Conventions, the Belgian Government stated:

"This ratification does not include the Belgian Congo, nor the Territory of Ruanda-Urundi under Belgian mandate."

B. STATISTICS FOR THE YEARS 1936 AND 1937 WITH REGARD TO OPIUM AND OTHER DANGEROUS DRUGS (INCLUDING THE STATEMENT CALLED FOR IN ARTICLE 14, PARAGRAPH 3, OF THE 1931 CONVENTION).

The substances are classified in the following order:

Substances with regard to which the statistics are furnished in virtue of the 1925 Convention:

1. Raw opium, medicinal opium and opium in the form of tinctures, extracts, and such other preparations containing more than 0.2%, but not more than 20%, of morphine as are made direct from raw or medicinal opium;
2. Coca leaves;
3. Galenical preparations of Indian hemp;
4. Indian hemp;
5. Indian hemp resin.

"Drugs" of "Group I" as specified in Article 1, paragraph 2, of the 1931 Convention:

6. Morphine;
7. Diacetylmorphine;
8. Benzoylmorphine;
9. Crude cocaine;*
10. Cocaine;
11. Ecgonine methyl ester;
12. Dihydrohydroxycodoinone;
13. Dihydrocodoinone;
14. Dihydromorphinone;
15. Acetyldihydrocodoinone or acetyldemethylodihydrothebaine;
16. Morphine-N-oxide;
17. Ecgonine;
18. Thebaine;
19. Benzylmorphine.

"Drugs" of "Group II" as specified in Article 1, paragraph 2, of the 1931 Convention:

20. Methylmorphine (codeine);
21. Ethylmorphine.

The following set of tables, which group together the whole of the statistical information received by the Board, has been drawn up with a view to striking a balance, whenever possible, which will enable the Board to ascertain the total amounts available in each country. These data are indispensable to the Board in the discharge of its duties under Articles 24 and 26 of the 1925 Convention.

The columns numbered in Arabic figures contain data drawn from the statistics supplied by Governments.

The columns numbered in Roman figures contain various calculations made by the Board with a view to drawing up the balance-sheet:

The figures in column I represent the total assets—*i.e.*, the quantities in stock at the beginning of the year, to which have been added, during the course of the year, the amounts produced, manufactured and imported, and the released seizures.

* Under Article 4 (b) of the 1925 Convention, crude cocaine is treated separately, whereas the 1931 Convention treats partly manufactured drugs such as crude cocaine as falling under the definition of the drug itself. The Board considers it indispensable to have a separate table showing the manufacture and movement in crude cocaine in view of the fact that this drug passes into commerce in its crude form.

The figures in column II represent the total liabilities—i.e., the amounts used for consumption, conversion, exportation and Government requirements.

The figures in column III, which represent the difference between columns I and II, indicate the amounts which should be in stock according to the Board's calculations. These quantities cannot in all cases agree with the actual amount of the stocks held at the end of the year. For instance, the Board does not always receive information with regard to substances confiscated in the interior of the country which have been released or added to stocks. Moreover, the omission of quantities below one kilogramme in most of the returns is bound to produce certain divergencies.

Tables 6 to 21, relating to the "drugs" specified in Article 1, paragraph 2, of the 1931 Convention, contain several columns which show whether Governments have complied with the obligations they assumed under this Convention. The figures shown in these columns, which are differentiated by capitals, have been taken from the following sources:

Column A — *Total of estimates.*¹ Last column of Table III in the statements of "Estimated World Requirements of Dangerous Drugs in 1936 and 1937" (documents C.429.M.220. 1935.XI and O.S.B./Statement 1937 and Supplements thereto) issued by the Supervisory Body.

Column B — *The maximum quantity which is permitted to be imported under Article 12 of the 1931 Convention.* The quantity shown is made up of the "total of the estimates" plus the quantity exported, minus the quantity manufactured.

Column C — *Estimate*¹ *of the quantity of the drug necessary for use as such.* Item I of Table III of "Estimated World Requirements of Dangerous Drugs".

Column D — *Estimate*¹ *of the quantity necessary for the purpose of conversion.* Item II of Table III of "Estimated World Requirements of Dangerous Drugs".

Column E — *Estimate*¹ *of the amount of stocks which it was desired to maintain.* Item III of Table III of "Estimated World Requirements of Dangerous Drugs".

The "total of the estimates" (column A) is inserted in conformity with Article 14, paragraph 3 (a), of the 1931 Convention. Columns B, C, D and E are placed after the columns with which they have to be compared.

In the case of column C, however, both the quantities consumed and the quantities used for the compounding of preparations, exports of which do not require export authorisations, must be taken into account.

The stocks held at the end of the year represent the stocks reported as held by wholesalers as well as by the Government for consumption in the country for *other* than Government purposes. These stocks correspond to the "reserve stocks" as defined in Article 1, paragraph 4, of the 1931 Convention.

"Government stocks" proper, including only stocks under Government control for the use of the military, naval and air forces of the country or to meet exceptional circumstances, are not reported to the Board, nor is their level estimated for.

Under the terms of the 1931 Convention, the Board does not ask for consumption returns for the "drugs" of "Group II" (codeine and ethylmorphine). An attempt has, however, been made to obtain approximate consumption figures regarding these drugs by deducting the amounts converted, exported and in stock at the end of the year from the total of the stocks at the beginning of the year, the amounts manufactured and imported, and the seizures released during the year. The figures calculated on this basis are inserted in the tables. They include the quantities utilised for the compounding of preparations of these drugs which do not fall under the Conventions, whether these preparations are consumed in the country or exported. Whenever the consumption is reported by Governments, it is shown in footnotes appended to the tables.

ABBREVIATIONS.

N.R. = No report received.

— = Quantities "nil" or negligible (which fall below one kilogramme).

¹ All quantities falling below one kilogramme have been omitted when reproducing the estimates.

1. — Opium brut, opium médicinal et opium sous forme de teintures, d'extraits et de toutes autres préparations contenant plus de 0,2%, mais pas plus de 20%, de morphine, fabriqués directement avec de l'opium brut ou médicinal.

(a) Returns for one quarter missing.

(b) Returns for three quarters missing.

(c) (i) The figures of stocks, production, confiscations and purchases for Government purposes only refer to British India.

(ii) Since April 1st, 1937, Burma is no longer a part of India and has furnished her own statistics as from this date. It is not possible to strike a balance for 1937 in regard to India.

(d) These figures include quantities issued to the Indian States; 43,096 kg. of raw opium, 37 kg. of medicinal opium and 4 opium in the form of preparations in 1936 and 51,334 kg. of raw opium, 191 kg. of medicinal opium and 32 kg. of opium in the preparations in 1937.

(e) No figures available, each individual smoker preparing the opium for his own use.

1. — Opium brut, opium médicinal et opium sous forme de teintures, d'extraits et de toutes autres préparations contenant plus de 0,2%, mais pas plus de 20%, de morphine, fabriqués directement avec de l'opium brut ou médicinal (suite).

Pays	Année	Population en millions	A = Opium brut B = Opium médicinal C = Opium sous forme de teintures, d'extraits, etc. A = Raw opium B = Medicinal opium C = Opium in the form of tinctures, extracts, etc.	1	2	3	4	1	5	6	7
				Stocks à la fin de l'année précédente	Production d'opium brut	Quantité importée (y compris la quantité importée pour les besoins de l'Etat)	Quantité confisquée qui a été remise en circulation ou versée aux stocks	Total des colonnes 1 à 4	Quantité importée pour les besoins de l'Etat	Quantité achetée dans le pays pour les besoins de l'Etat	Quantité consommée
Year	Population in millions			Stocks at the end of previous year	Production of raw opium	Quantity imported (including the quantity imported for Government purposes)	Quantity confiscated which has been re-issued or added to stocks	Total of columns 1 to 4	Quantity imported for Government purposes	Quantity bought in the country for Government purposes	Quantity consumed

(a) Vu la différence entre ce renseignement et le chiffre de la colonne III, le Comité a demandé aux autorités compétentes de réexaminer les statistiques.

(b) Y compris 53 501 kg d'opium préparé rebouilli en 1936 et 27 924 kg. en 1937.

(c) Y compris la consommation d'opium de l'accise utilisé pour être mangé et fumé.

(d) On ne dispose pas de ces données, car l'opium est préparé par chaque fumeur pour son propre usage.

(e) A partir du 1^{er} avril 1937, la Birmanie ne fait plus partie de l'Inde.

(f) Non indiqué. Le Gouvernement déclare que l'opium à fumer a été préparé à l'aide des feuilles servant d'enveloppe à l'opium brut importé.

1. — Raw Opium, Medicinal Opium and Opium in the Form of Tinctures, Extracts, and such Other Preparations containing more than 0.2%, but not more than 20%, of Morphine as are made direct from Raw or Medicinal Opium (continued).

(a) In view of the difference between this information and the figure in column III, the Board has asked the competent authorities to re-examine the statistics.

(b) Including 53,501 kg. of prepared opium reboiled in 1936 and 27,924 kg. in 1937.

(c) Including consumption of excise opium used for eating and smoking purposes.

(d) No figures available, each individual smoker preparing the opium for his own use.

(e) Since April 1st, 1937, Burma is no longer a part of India.

(f) Not given. The Government states that the smoking-opium was prepared out of the wrappings of the raw opium imported.

1. — Opium brut, opium médicinal et opium sous forme de teintures, d'extraits et de toutes autres préparations contenant plus de 0,2%, mais pas plus de 20%, de morphine, fabriqués directement avec de l'opium brut ou médicinal (suite).

(a) Il n'existe pas de contrôle de l'importation, de l'exportation et de la consommation des feuilles de coca en Argentine.
 (b) L'Argentine à coca croit à l'état sauvage et particulièrement dans les régions habitées par les indigènes. Il n'existe aucune donnée relative à la quantité de feuilles produites et en stock. Aucun laboratoire n'extrait d'alcaloïde.
 Ce n'est qu'à partir du IV^e trimestre de 1936, que les relevés fournis par le Pérou contiennent des chiffres d'exportation de feuilles de coca.

(a) There is no legislative control of the imports, exports and consumption of coca leaves in the Argentine.

(b) The coca tree grows in a wild state, particularly in the districts inhabited by natives. No data are available regarding the quantity of leaves produced and in stock. There is no laboratory which extracts alkaloids.

(c) The Peruvian returns only contain figures for the export of coca leaves since the fourth quarter of 1936.

(a) Vu la différence entre ce renseignement et le chiffre de la colonne III, le Comité a demandé aux autorités compétentes de réexaminer les statistiques.
 (b) Deux relevés trimestriels manquent.
 (c) En 1936, 472 kg. ont été extraits de 826.120 kg. de paille de pavot; les chiffres correspondants pour 1937 étaient 810 kg. et 920 060 kg. respectivement.
 (d) Evaluation approximative.
 (e) En outre, le stock de morphine brute s'élevait à 274 kg. au début de 1936; à 183 kg. à la fin de 1936 et à 181 kg. à la fin de 1937, contenant respectivement 219 kg., 142 kg. et 141 kg de morphine pure.
 (f) En 1936, 504 kg. ont été obtenus de 634 kg. de morphine brute; les chiffres correspondants pour 1937 étaient 347 kg. et 457 kg. respectivement.
 (g) En outre, 542 kg. de morphine brute ont été importés en 1936 et 455 kg. en 1937 contenant respectivement 427 kg. et 344 kg. de morphine pure.

(a) In view of the difference between this information and the figure in column III, the Board has asked the competent authorities to re-examine the statistics.

(b) Returns for two quarters missing.

(c) In 1936, 472 kg. were manufactured from 826,120 kg. of poppy straw. The corresponding figures for 1937 were 810 kg. and 920,060 kg. respectively.

(d) Approximate estimate.

(e) In addition, the stock of crude morphine amounted to 274 kg. at the beginning of 1936, to 183 kg. at the end of 1936 and to 181 kg. at the end of 1937, containing respectively 219 kg., 142 kg. and 141 kg. of pure morphine.

(f) In 1936, 504 kg. were obtained from 634 kg. of crude morphine. The corresponding figures for 1937 were 347 kg. and 457 kg. respectively.

(g) In addition, 542 kg. of crude morphine were imported in 1936 and 455 kg. in 1937, containing respectively 427 kg. and 354 kg. of pure morphine.

(a) Trois relevés trimestriels manquant.

(b) Les données concernant les stocks, la fabrication, la transformation, les confiscations et les achats pour les besoins de l'Etat ne se réfèrent qu'à l'Inde britannique.

(c) A partir du 1^{er} avril 1937, la Birmanie ne fait plus partie de l'Inde. La Birmanie ayant fourni ses propres statistiques depuis cette date, il n'est pas possible d'établir le bilan de 1937.

(d) En outre, 453 kg. de morphine brute ont été fabriqués en 1936 et 449 kg. en 1937, contenant respectivement 340 kg. et 336 kg. de morphine pure.

(e) Y compris 17 kg. livrés aux Etats indiens en 1936 et 7 kg. en 1937.

(f) En outre, 446 kg. de morphine brute ont été exportés en 1936 et 453 kg. en 1937, contenant respectivement 331 kg. et 349 kg. de morphine pure.

(g) En 1936, 370 kg. ont été obtenus de 550 kg. de morphine brute; les chiffres correspondants pour 1937 étaient 782 kg. et 1.150 kg. respectivement.

(h) En outre, 550 kg. de morphine brute ont été importés en 1936 et 1.150 kg. en 1937, contenant respectivement 379 kg. et 778 kg. de morphine pure.

(a) Returns for three quarters missing.

(b) The information concerning the stocks, the manufacture, the conversion, the confiscations and the purchases for Government purposes only refers to British India.

(c) Since April 1st, 1937, Burma is no longer a part of India and has furnished her own statistics as from this date. It is therefore not possible to strike a balance for 1937.

(d) In addition, 453 kg. of crude morphine were manufactured in 1936 and 449 kg. in 1937, containing respectively 340 kg. and 336 kg. of pure morphine.

(e) Including 17 kg. issued to Indian States in 1936 and 7 kg. in 1937.

(f) In addition, 446 kg. of crude morphine were exported in 1936 and 453 kg. in 1937, containing respectively 331 kg. and 349 kg. of pure morphine.

(g) In 1936, 379 kg. were obtained from 550 kg. of crude morphine. The corresponding figures for 1937 were 782 kg. and 1,150 kg. respectively.

(h) In addition, 550 kg. of crude morphine were imported in 1936 and 1,150 in 1937, containing respectively 379 kg. and 778 kg. of pure morphine.

- (a) Converted into codeine.
(b) Quantity seized in 1929.

9. — Cocaine brute. — 9. — Crude Cocaine.

Aux termes de l'article 4 b) de la Convention de 1953, la cocaine brute est traitée séparément, tandis que la Convention de 1931 traite les drogues partiellement fabriquées, telle la cocaine brute, comme tombant sous la définition de la drogue elle-même. Le Comité considère indispensable d'avoir un tableau séparé montrant la fabrication et le mouvement de la cocaine brute, étant donné que cette drogue passe dans le commerce sous sa forme brute.

Under Article 4 b) of the 1953 Convention, crude cocaine is treated separately, whereas the 1931 Convention treats partly manufactured drugs, such as crude cocaine as falling under the definition of the drug itself. The Board considers it indispensable to have a separate table showing the manufacture and movement in crude cocaine in view of the fact that this drug passes into commerce in its crude form.

(a) Il y a lieu, en outre, de tenir compte des chiffres suivants relatifs à la « cocaïne technique » — produit impur dont, par raffinage, on peut fabriquer la cocaïne pure (rendement 95%) : stocks : 33 kg. au début de 1936, 64 kg. à la fin de 1936 et 118 kg. à la fin de 1937 ; fabrication : 159 kg. en 1936 et 117 kg. en 1937 ; 130 kg. en 1936 et 63 kg. en 1937 ont été utilisés pour la fabrication de la cocaïne.

(b) Vu la différence entre ce renseignement et le chiffre de la colonne III, le Comité a demandé aux autorités compétentes de réexaminer les statistiques.

(c) Evaluation approximative.

(d) 13 kg. ont été volés chez un grossiste.

10. — Cocaine (continued).

[illegible]

(a) En outre, 26 kg. ont été utilisés pour la fabrication de paracodine en 1936 et 92 kg. en 1937.
(b) Chiffre approximatif. Le contrôle de l'importation et de l'exportation de la méthylmorphine a été institué le 15 août 1936.
(c) Consommation déclarée: 3.962 kg. en 1936 et 3.069 kg. en 1937.
(d) Evaluation approximative.
(e) Consommation déclarée: 371 kg. en 1936 et 488 kg. en 1937 (y compris 273 kg. employés pour la confection de préparations en 1936 et 372 kg. en 1937).
(f) Consommation déclarée: 171 kg. en 1936 et 140 kg. en 1937 (y compris 32 kg. employés pour la confection de préparations en 1936 et 41 kg. en 1937).
(g) In addition, 26 kg. were used for the manufacture of paracodine in 1936 and 92 kg. in 1937.
(h) Approximate figure. The control over imports and exports of methylmorphine was instituted on August 15th, 1936.
(i) Reported consumption: 3,962 kg. in 1936 and 3,069 kg. in 1937.
(j) Approximate estimate.
(k) Reported consumption: 371 kg. in 1936 and 488 kg. in 1937 (including 273 kg. used for the compounding of preparations in 1936 and 372 kg. in 1937).
(l) Reported consumption: 171 kg. in 1936 and 140 kg. in 1937 (including 32 kg. used for the compounding of preparations in 1936 and 41 kg. in 1937).

(e) En outre, 26 kg. ont été utilisés pour la fabrication de paracodine en 1936 et 92 kg. en 1937.
(f) Chiffre approximatif. Le contrôle de l'importation et de l'exportation de la méthylmorphine a été institué le 15 août 1936.
(g) Consommation déclarée: 3.962 kg. en 1936 et 3.069 kg. en 1937.
(h) Evaluation approximative.
(i) Consommation déclarée: 371 kg. en 1936 et 488 kg. en 1937 (y compris 273 kg. employés pour la confection de préparations en 1936 et 372 kg. en 1937).
(j) Consommation déclarée: 171 kg. en 1936 et 140 kg. en 1937 (y compris 32 kg. employés pour la confection de préparations en 1936 et 41 kg. en 1937).

C. TABLES SHOWING THE CALCULATION OF SURPLUS MANUFACTURE OF "DRUGS", IF ANY, OVER AMOUNTS PERMITTED FOR 1937.

Explanatory Note.

The following tables have been drawn up with a view to ascertaining whether the manufacturing countries have fulfilled the obligations undertaken in virtue of the 1931 Convention—i.e., whether the quantities manufactured in the different countries (column D) have remained within the limits stipulated by Articles 6 and 7 of the 1931 Convention, or whether any surplus manufacture has occurred, in which case these surpluses would have to be deducted from the amount to be manufactured during the following year.

The figures shown in the various columns are taken from the following sources:

Column 5: (Quantity exported): quarterly returns of exports (Central Opium Board Statistical Form A(GL), Item GL IV);

Column 6: (Quantity imported): quarterly returns of imports (Form A(GL), Item GL I);

Column 7: (Quantity seized and used for domestic consumption or for conversion): annual statistics of confiscations (Form E(GL), Item GL II(d) and (e));

Column 8: (Surplus manufacture in 1936 calculated in accordance with Articles 6 and 7 of the 1931 Convention): Report to the Council on the statistics of narcotics for the year 1936 and the work of the Permanent Central Opium Board during 1937 (document C.C.P.212(2)). These figures have been corrected and modified where necessary, in accordance with the amended returns supplied by Governments;

Columns 1, 2, 3, and 4: These columns contain the figures reported to the Board on the various statistical forms (see below), so far as these figures do not exceed the corresponding estimates shown in Table III of the Statement of "Estimated World Requirements of Dangerous Drugs in 1937" (document O.S.B./Statement 1937 and supplements thereto) published by the Supervisory Body. If, however, these figures exceed the estimates, the figures of the estimates are inserted accompanied by an asterisk. These four columns have been drawn up on the basis of the following data:

Statistics supplied to the Board:

Table III of the Statement of "Estimated World Requirements of Dangerous Drugs in 1937":

Column 1.

Quantity consumed and quantity used for the compounding of preparations for the export of which authorisations are not required (Form C(1)(GL), total of GL II and L III).

or Quantity necessary for use as such (Item I of Table III).

Column 2.

Quantity used for conversion (Form C(2)(GL), total of entries under GL IV).

or Quantity necessary for the purpose of conversion (Item II).

Column 3.

Difference between the stocks at the end of the year and those existing at the end of the previous year (Form D(GL), total of GL I and GL III).

or (a) Amount to be added to the reserve stocks to bring them up to the desired level (Item IV);
(b) Level of reserve stocks which it was desired to maintain (Item III).

Column 4.

Sum of quantity imported for Government purposes, total of the four quarterly reports (Form A(GL), Item GL II), quantity purchased in the country for Government purposes (Form C(1)(GL), Item GL I) and quantities confiscated and added to the Government stocks (Form E(GL), Item GL II(b)).

or Amount to be added to the Government stocks to bring them up to the desired level (Item V).

The total of the quantities in columns 1 to 5 (column A) less the total of columns 6 to 8 (column B) represents the quantity the manufacture of which was authorised under Articles 6 and 7 of the 1931 Convention (column C). A comparison of this quantity with the figures for manufacture given in Form C(2)(GL) under GL II (appearing in column D) will show whether there has been a surplus manufacture, and, if so, this surplus is inserted in column E. The last column (F) shows the surplus manufacture of each drug in each country during 1937 without taking into account the surplus manufacture in 1936.

Morphine.

D. TABLES SHOWING THE INTERNATIONAL MOVEMENT OF NARCOTICS IN 1937

1. The figures given in the tables have been furnished by the Governments in *Statistical Form A (GL)* (Quarterly Statistics of Imports and Exports) with the exception of codeine and ethylmorphine, imports and exports of which are reported on *Annual Form A (L)*. Where no return has been furnished or where returns are lacking for one or more quarters, the figures are necessarily incomplete and apply only to the period for which returns have been received. Where necessary, a note has been inserted against the name of the country.

2. Detailed data have only been given where the total annual imports or exports of a country amounted to or exceeded:

A hundred kilogrammes in the case of RAW OPIUM AND COCA LEAVES;

Ten kilogrammes in the case of MORPHINE, CRUDE COCAINE, COCAINE AND ETHYL-MORPHINE;

One kilogramme in the case of DIACETYLMORPHINE; and

Twenty-five kilogrammes in the case of CODEINE.

The figures for countries whose total imports and total exports fall below this limit are given under the heading "Amounts too low to be shown separately".

Thus, in the case of raw opium or coca leaves, if the total of both the imports and the exports of a given country amounted to 100 kilogrammes, this country is shown under "Importing countries" and "Exporting countries". If, however, its total imports come up to this limit, while its exports fall below the limit, the country is shown under "Importing countries", and its exports are included in "Amounts too low to be shown separately". Lastly, if its total exports come up to this limit, while its imports fall below the limit, the country is shown under "Exporting countries" and its imports are included in "Amounts too low to be shown separately".

3. The figures appearing in the upper half of the divisions have been supplied by the importing country; those appearing *in italics* in the lower half have been supplied by the exporting country.

4. In the tables relating to morphine, crude cocaine, cocaine, diacetylmorphine, codeine and ethylmorphine, the figures in brackets in the "TOTAL" column represent the total of the quantities less than one kilogramme omitted from the other columns.

5. As there are many more importing than exporting countries, the amounts below one kilogramme which are omitted from the tables add up to much more in the case of imports than in the case of exports. Hence the apparent discrepancies in the figures at the bottom of the table against the heading "Amounts too low to be shown separately".

Opium brut.

Cocaïne brute.

D'après l'article 4 f) de la Convention de 1923, la cocaïne brute est traitée séparément, tandis que la Convention de 1923 traite les drogues partiellement fabriquées, telle la cocaïne brute, comme tombant sous la définition de la drogue chimique. Le Comité considère indispensable d'avoir un tableau séparé montrant le mouvement de la cocaïne brute et notant que cette drogue passe dans le commerce sous sa forme brute.

Crude Cocaine.

Under Article 4 (b) of the 1925 Convention, crude cocaine is treated separately, whereas the 1931 Convention treats partly manufactured drugs such as crude cocaine as falling under the definition of the drug itself. The Board considers it indispensable to have a separate table showing the movement in crude cocaine in view of the fact that this drug passes into commerce in its crude form.

* Divergence attribuable au fait que des quantités exportées à la fin d'une année n'arrivent à destination qu'au début de l'année suivante.

(a) Ce pays n'a pas fourni les statistiques relatives à l'éthylmorphine

(b) Exportation de la Hongrie.

(c) Ce chiffre représente les exportations suivantes, de l'Espagne, 1 kg., des Etats-Unis d'Amérique, 1 kg. et du Japon, 8 kg.

* Discrepancy assumed to be due to the fact that quantities exported at the end of one year only arrive at their destination at the beginning of the following year.

(a) No statistics regarding ethylmorphine have been supplied by this country.

(b) Exported from Hungary

(c) This figure represents the following exports: from Spain (1 kg.), from the United States of America (1 kg.) and from Japan (8 kg.).

E. ANNUAL STATISTICS OF CONFISCATIONS.

I. — Confiscations effected in 1937 on account of Illicit Import or Export.

RAW OPIUM (Total 9,802 kg.).

(a) Confiscations on account of illicit import (Total 8,615 kg.):

	kg.		kg.
U.S.S.R.	2,131	Ceylon	76
Egypt	1,012	France	52
Hong-Kong	877	Formosa	51
French Indo-China	804	Madagascar and dependencies	15
Siam	551	Kwantung	11
Burma	509	British Malaya	9
Spain	504	Reunion	9
Netherlands Indies	413	French Guiana	5
Syria and Lebanon	380	Aden and dependencies	4
Korea	319	French Settlements in Oceania	4
China	202	Cuba	3
Palestine	186	Barbados	3
Iraq	141	Curacao	3
India	139	Mozambique	3
Netherlands	110	Union of South Africa	1
United States of America	87	Bahrain Islands	1

(b) Confiscations on account of illicit export (Total 1,186 kg.):

	kg.		kg.
Korea	493	Turkey	67
China	332	Bulgaria	55
Syria and Lebanon	179	Kwantung	4
India	146		

MEDICINAL OPIUM.

Confiscations on account of illicit import: China 90 kg.

OPIUM IN THE FORM OF PREPARATIONS (Total 123 kg.).

(a) Confiscations on account of illicit import: China	4 kg.
(b) Confiscations on account of illicit export: China	119 kg.

COCA LEAVES.

Confiscations on account of illicit import: Chile 213 kg.

INDIAN HEMP (Total 2,752 kg.).

Confiscations on account of illicit import:

	kg.		kg.
Union of South Africa	1,453	British Malaya	23
Egypt	549	Iraq	13
Tunis	366	Canada	1
U.S.S.R.	199	Mauritius	1
Morocco (French Zone)	83	Tanganyika	1
India	63		

INDIAN HEMP RESIN (Total 724 kg.).

(a) Confiscations on account of illicit import (Total 516 kg.):

	kg.		kg.
India	195	Roumania	5
Turkey	129	Trans-Jordan	5
Palestine	94	Hungary	3
Ceylon	73	United Kingdom	2
Burma	8	Syria and Lebanon	2

(b) Confiscations on account of illicit export (Total 208 kg.):

Basutoland	200 kg.	India	8 kg.
----------------------	---------	-----------------	-------

MORPHINE (Total 79 kg.).

(a) Confiscations on account of illicit import (Total 46 kg.):

	kg.		kg.
United States of America	14	Canada	1
Switzerland	13	Cuba	1
Philippines	8	Siam	1
Kwantung	5	Korea	1
France	2		

(b) Confiscations on account of illicit export (Total 33 kg.):

Yugoslavia	31 kg.	Kwantung	2 kg.
----------------------	--------	--------------------	-------

I. — Confiscations effected in 1937 on account of Illicit Import or Export (concluded).

DIACETYLMORPHINE (Total 147 kg. and 4,516 pills).

(a) Confiscations on account of illicit import (Total 141 kg. and 4,516 pills):

	kg.		kg.
United States of America	54	France	9
Hong-Kong	37	Kwantung	2
China	28	Greece	1
Egypt	9	Korea	1
Macao			4,516 pills

(b) Confiscations on account of illicit export (Total 6 kg.):

Bulgaria	4 kg.	Yugoslavia	2 kg.
--------------------	-------	----------------------	-------

BENZOYLMORPHINE.

Confiscations on account of illicit import: Kwantung 2 kg.

COCAINE (Total 31 kg.).

Confiscations on account of illicit import:

	kg.		kg.
India	11	France	3
Burma	10	Cuba	2
Hong-Kong	5		

II. — Substances confiscated and destroyed in 1937.

These figures may include quantities confiscated during previous year.

RAW OPIUM (Total 4,556 kg.).

	kg.		kg.
Hong-Kong	2,232	Mauritius	6
Egypt	1,012	Madagascar and dependencies	5
Syria and Lebanon	559	Formosa	5
China	281	Aden and dependencies	4
Palestine	205	Barbados	3
Korea	78	Burma	3
Turkey	67	Curacao	3
United States of America	59	Netherlands Indies	3
India	18	Mozambique	3
Reunion	9	Bahrein Islands	1

OPIUM IN THE FORM OF PREPARATIONS: China 78 kg

INDIAN HEMP (Total 11,934 kg.).

	kg.		kg.
Syria and Lebanon	8,750	British Malaya	23
Union of South Africa	1,346	Iraq	3
Egypt	519	Canada	1
Turkey	510	United Kingdom	1
Tunis	366	Mauritius	1
Bechuanaland	327	Tanganyika	1
India	56		

INDIAN HEMP RESIN (Total 1,457 kg.).

	kg.		kg.
Burma	774	India	36
Turkey	251	Syria and Lebanon	22
Basutoland	200	Trans-Jordan	5
Palestine	94	United Kingdom	2
Ceylon	73		

MORPHINE (Total 8 kg.).

	kg.		kg.
United States of America	2	China	1
Philippines	2	Siam	1
Canada	1	United Kingdom	1

DIACETYLMORPHINE (Total 169 kg. and 3,936,230 pills).

	kg.		kg.
France	98	Egypt	9
Hong-Kong	40	United States of America	8
China	13	Greece	1

COCAINE (Total 6 kg.).

Hong-Kong	5 kg.	China	1 kg.
---------------------	-------	-----------------	-------

(a) This information has only been supplied to the Board as from 1934—i.e., since the coming into force of the 1931 Convention.

(b) Austria, Bulgaria, Denmark, Finland and Norway.

(c) The total quantity of morphine converted and of morphine remaining as such exceeds the total manufacture of morphine because some of the morphine converted was drawn from stocks.

G. GRAPHS DRAWN UP IN RESPECT OF A CERTAIN NUMBER OF COUNTRIES SHOWING THE CONSUMPTION, PER MILLION INHABITANTS, OF MORPHINE, DIACETYLMORPHINE AND COCAINE DURING THE YEARS 1933 TO 1937.

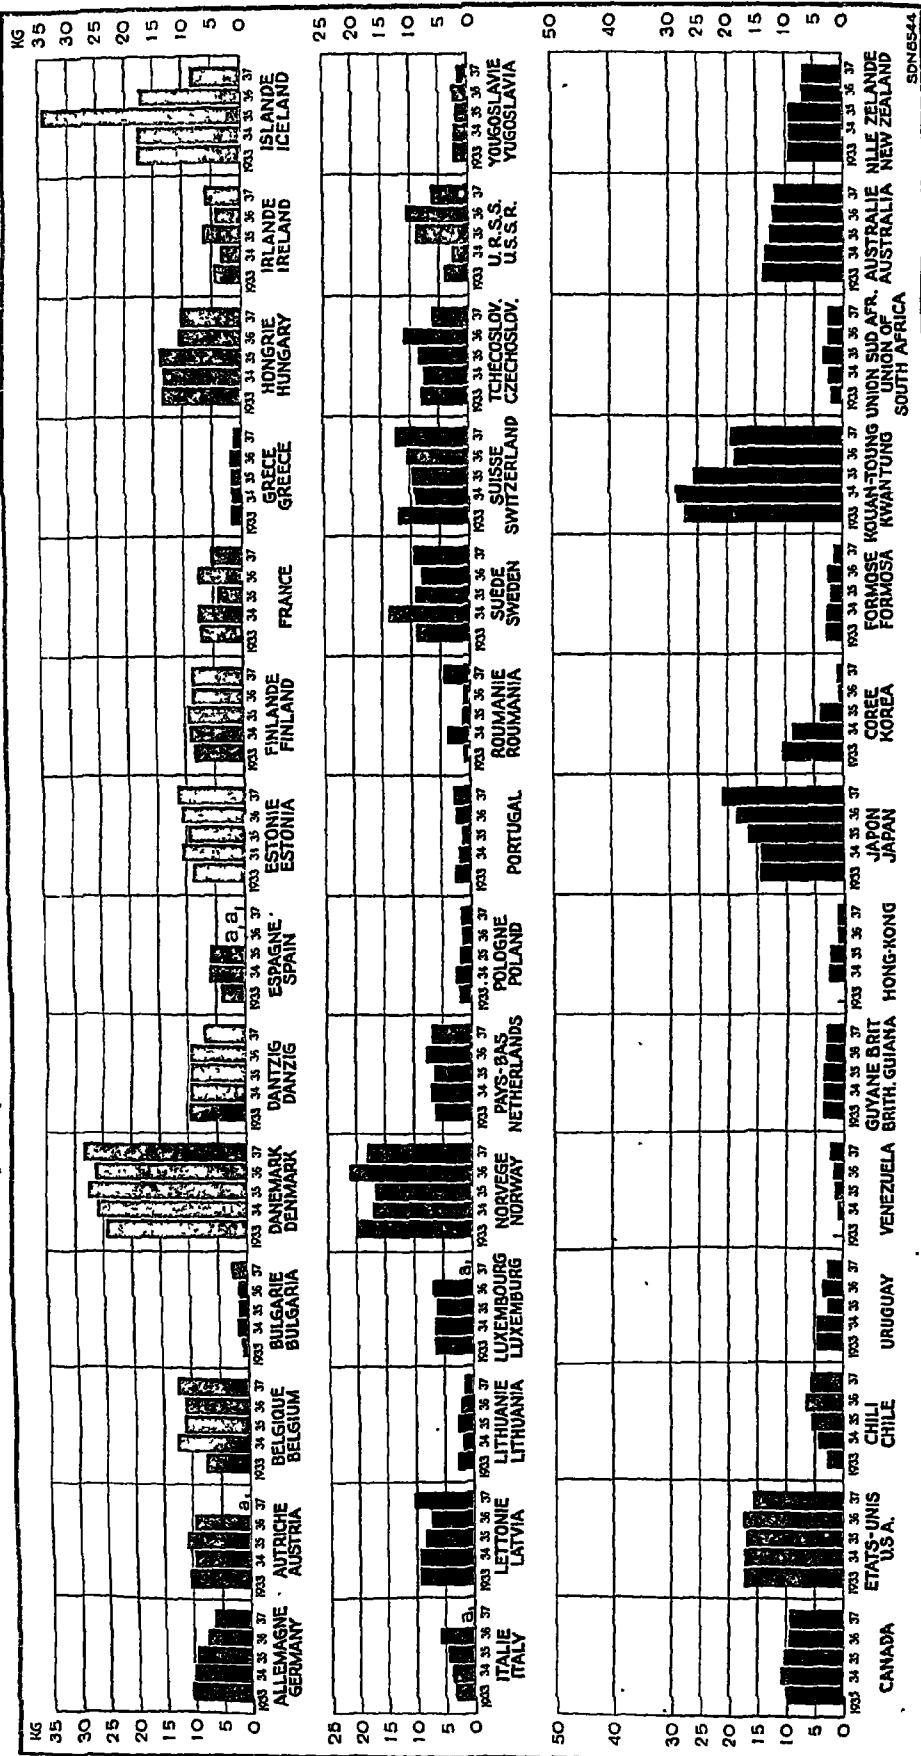

These graphs concern only countries or territories for which information regarding consumption has been received for at least three years and where the figures were such as to make presentation in graph form possible.

Note referred to in the Graphs.

(a) Figure not available.

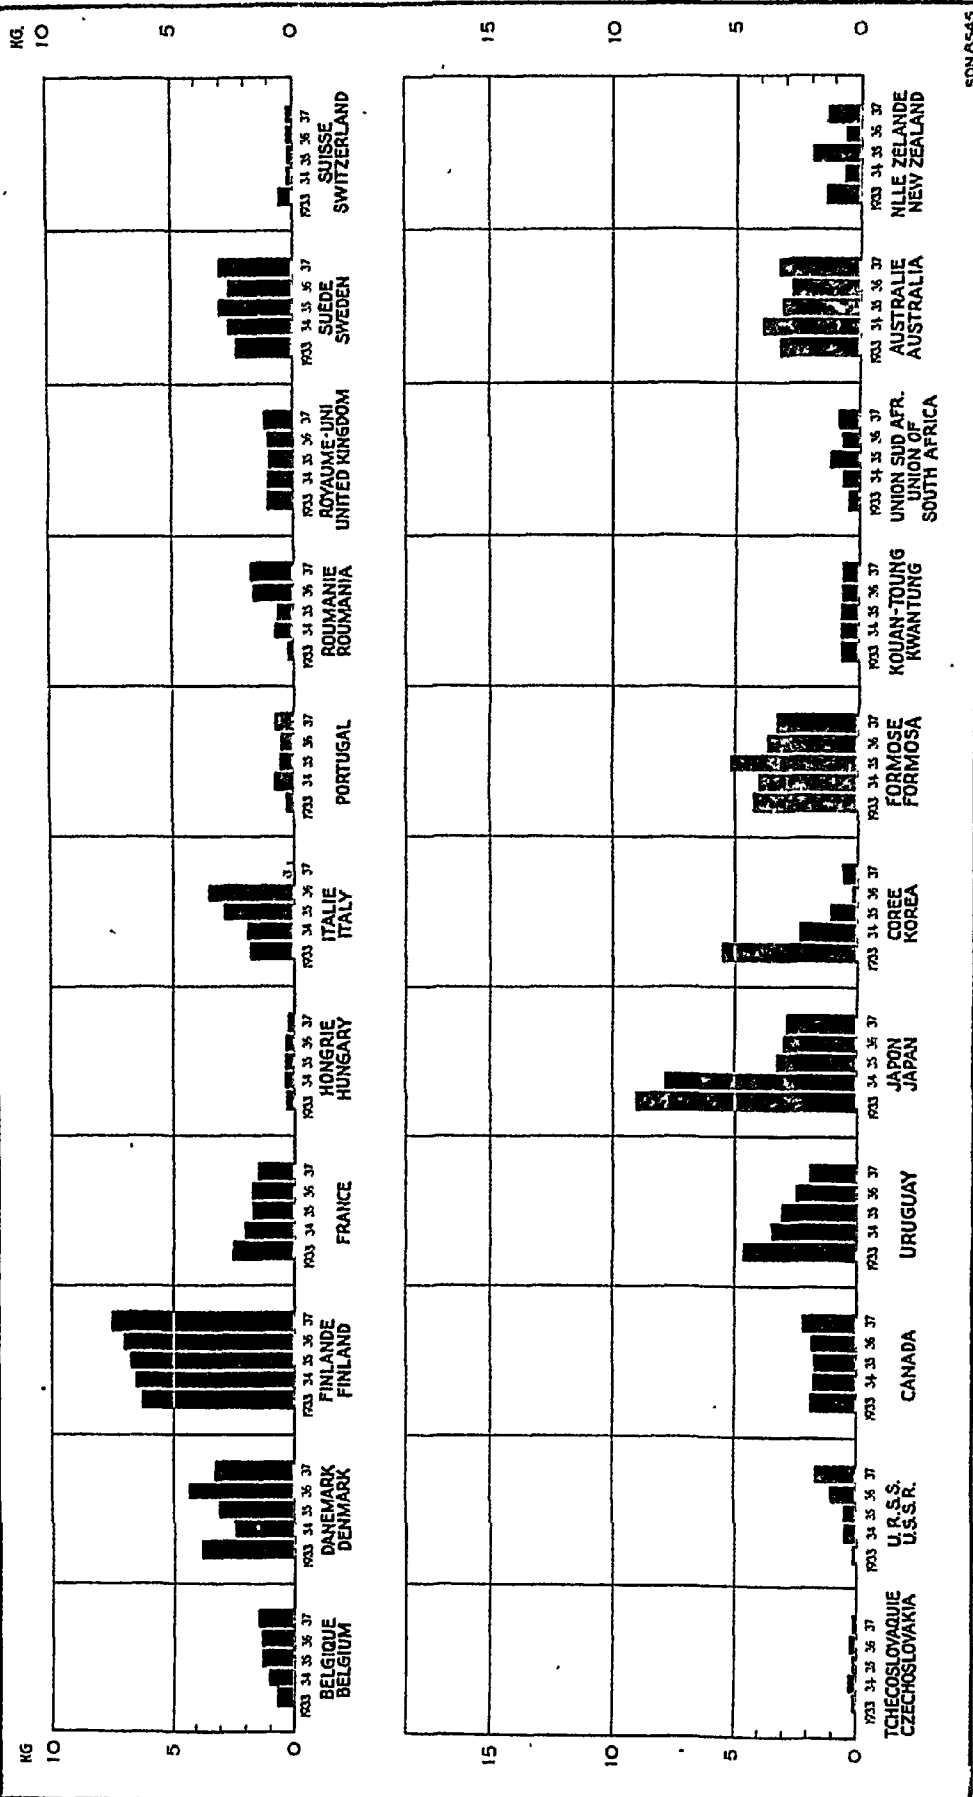

MORPHINE

Consumption per million inhabitants during the years 1933 to 1937.

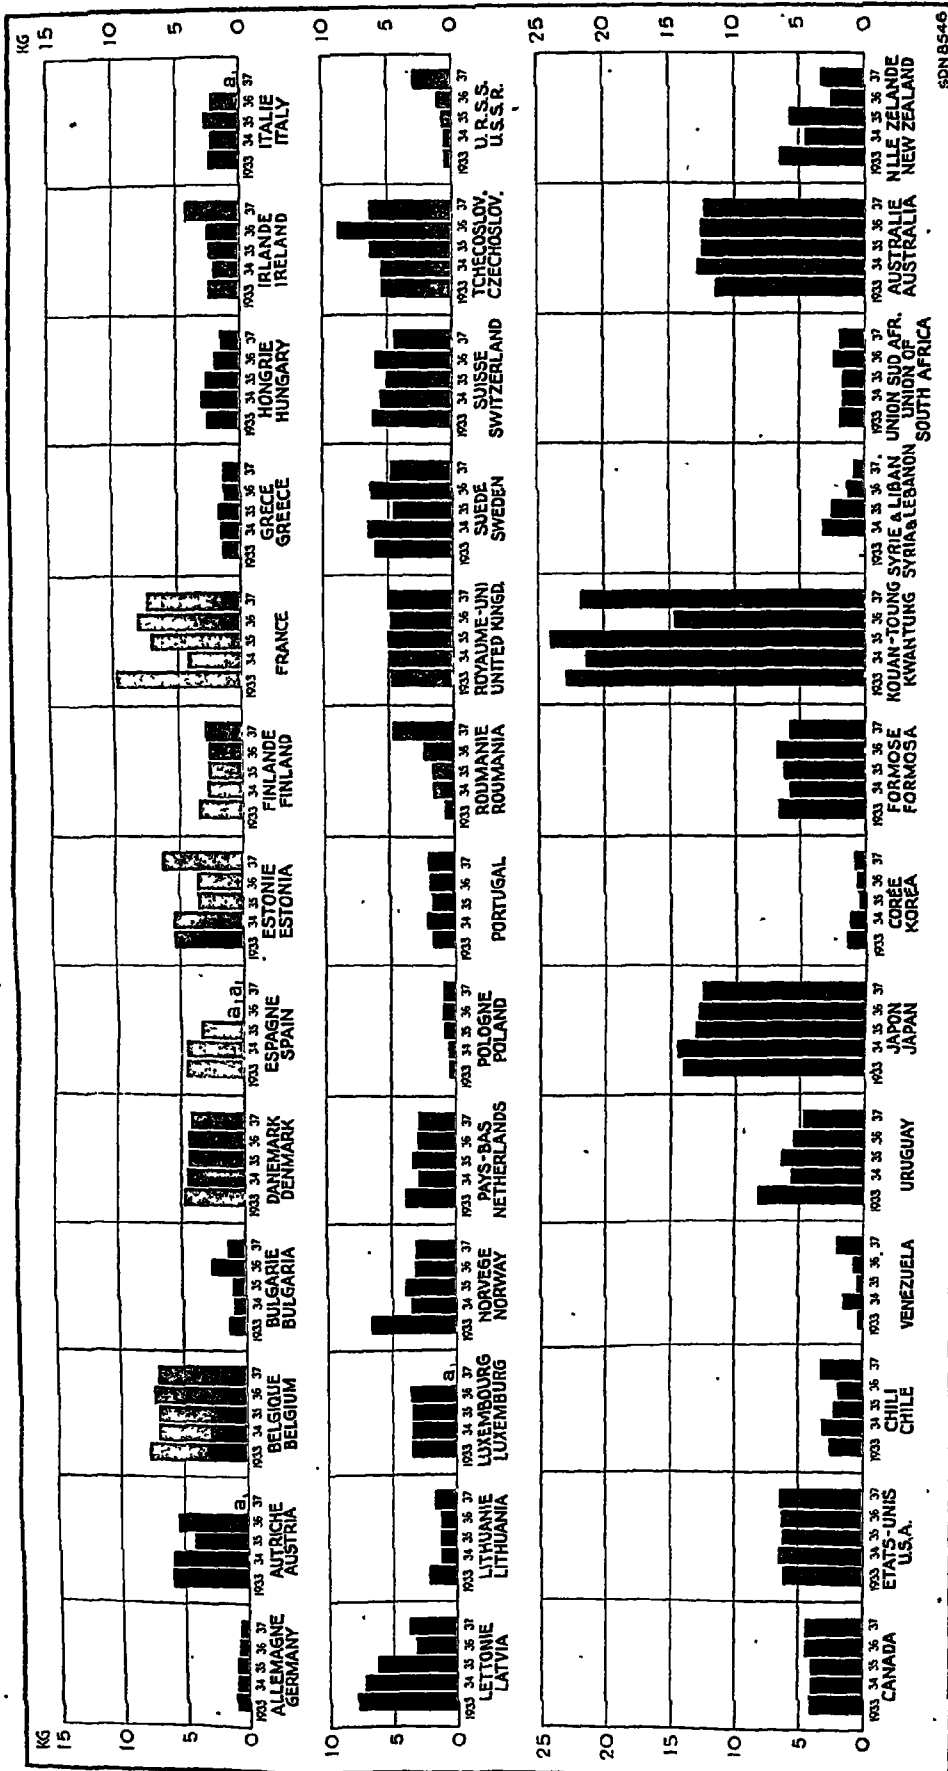

DIACETYLMORPHINE

Consumption per million inhabitants during the years 1933 to 1937.

COCAINE

Consumption per million inhabitants during the years 1933 to 1937.

H. GRAPHS DRAWN UP IN RESPECT OF THE PRINCIPAL MANUFACTURING COUNTRIES SHOWING THE MANUFACTURE AND CONVERSION OF MORPHINE, AND THE MANUFACTURE OF DIACETYLMORPHINE AND COCAINE DURING THE YEARS 1933 TO 1937.

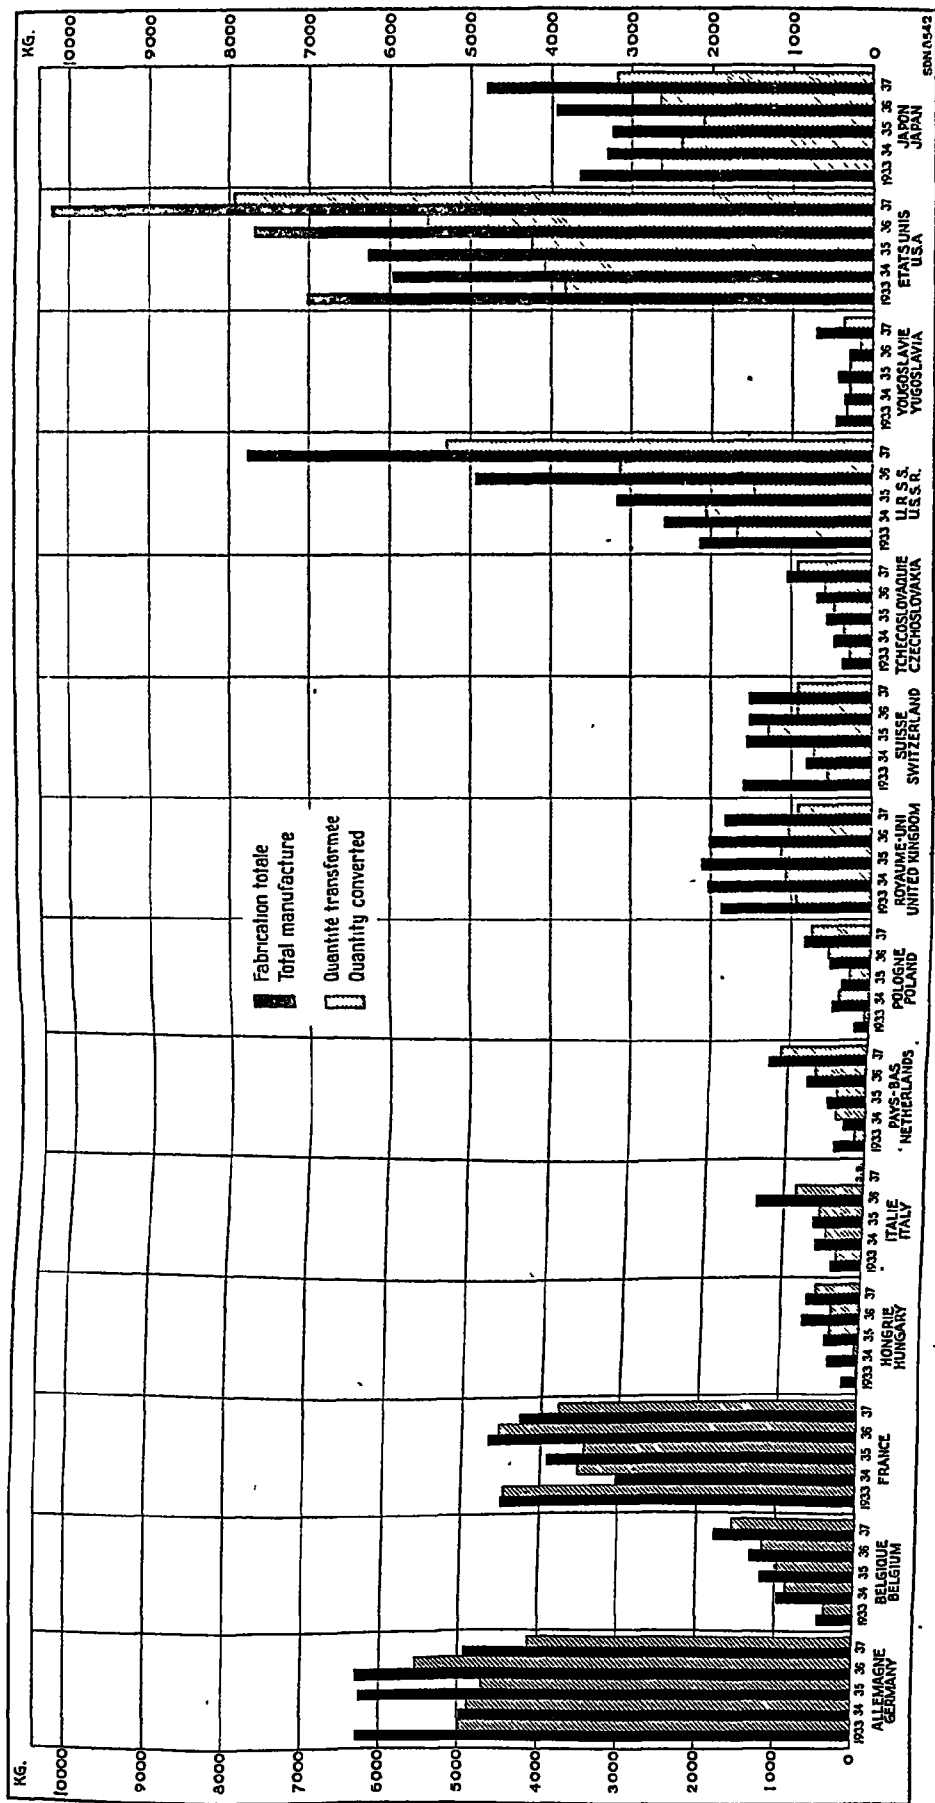

These graphs have been drawn up in respect of the countries and territories which during one of the five years under review have manufactured more than 500 kg. of morphine or more than 50 kg. of diacetylmorphine or cocaine. The figures for all manufacturing countries which send reports to the Board can be found in Part B.

Note referred to in the Graphs.

(a) Figure not available.

MORPHINE

Manufacture and Conversion during the years 1933 to 1937.

DIACETYLMORPHINE AND COCAINE

Manufacture during the years 1933 to 1937.
